

ID	Abstract	US_num	LLM	role_shorten	User story	Implied ethical needs	Non-Functional Requirements	atomic	minimal	Conceptually sound	Problem-oriented	Unambiguous	Conflict-free	Conflict-free, us	Estimatable	Independent
A1US1Ge	A1	US1	Gemini_1.5_flash	driver	As a driver, I want a car that uses AI and real-time data to react faster than humans in emergency situations, reducing my risk of accidents.	N/A	Performance	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A1US2Ge	A1	US2	Gemini_1.5_flash	city planner	As a city planner, I want a traffic management system that uses AI and connected vehicles to optimize traffic flow and reduce congestion.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	General	conflict	A1US9Ge	No	No
A1US3Ge	A1	US3	Gemini_1.5_flash	car manufacturer	As a car manufacturer, I want to develop AVs with advanced sensors and AI algorithms that can accurately perceive their surroundings and make safe driving decisions.	Non-maleficence(Safety)	Safety - Accuracy - Reliability	conjunctions	minimal	Conceptually sound	solution_oriented	General	Conflict-free		No	No
A1US4Ge	A1	US4	Gemini_1.5_flash	visually impaired person	As a blind or visually impaired person, I want an AV that can safely navigate me around town, giving me greater independence.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	independent
A1US5Ge	A1	US5	Gemini_1.5_flash	environmentalist	As an environmentalist, I want AVs that are programmed for fuel efficiency and can reduce overall emissions and pollution in our cities.	Sustainability	Efficiency	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A1US6Ge	A1	US6	Gemini_1.5_flash	professional	As a busy professional, I want an AV that can take me to meetings or appointments while I work on other tasks, saving me valuable time.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A1US7Ge	A1	US7	Gemini_1.5_flash	advocate	As a safety advocate, I want clear regulations and safety standards for AVs to ensure the well-being of all road users.	Non-maleficence(Safety) - Responsibility	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		estimatable	independent
A1US8Ge	A1	US8	Gemini_1.5_flash	cybersecurity expert	As a cybersecurity expert, I want AVs to be equipped with robust security measures to protect them from hacking and cyberattacks.	Non-maleficence(Security)	Security	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
A1US9Ge	A1	US9	Gemini_1.5_flash	advocate	As a data privacy advocate, I want control over the data collected by AVs and ensure it's used responsibly and securely.	Privacy - Responsibility - Non-maleficence(Security) - Human Autonomy	Privacy - Accuracy - Reliability	conjunctions	minimal	Conceptually sound	problem-oriented	Vagueness	source	A1US2Ge	estimatable	independent
A1US10Ge	A1	US10	Gemini_1.5_flash	company	As a delivery company, I want to explore the use of AVs for efficient and cost-effective last-mile delivery services.	N/A	N/A	atomic	minimal	no_feature						
A1US1LI	A1	US1	Llama 3.1 70b	researcher	As a researcher, I want to explore the possibilities of Artificial Intelligence (AI) in enabling the smart industrial revolution, so that I can contribute to the development of innovative solutions for industry 4.0.	N/A	N/A	atomic	brackets	no_feature						
A1US2LI	A1	US2	Llama 3.1 70b	engineer	As an engineer, I want to design and develop Internet of Things (IoT) infrastructure that can collect and process data from various sources, including storage, actuation, sensing, advanced services, and communication technologies, so that I can enable the transformation towards fully smart Autonomous Vehicles (AVs).	N/A	N/A	conjunctions	brackets	no_valid_roles	resolution_oriented	General	Conflict-free		No	No

A1US3LI	A1	US3	Llama 3.1 70b	safety expert	As a safety expert, I want to utilize AI and IoT to reduce the risk of accidents and improve vehicle safety, so that I can minimize the likelihood of human error and ensure a safer driving experience. As a driver, I want to benefit from the increased safety and reduced accidents that Autonomous Vehicles (AVs) can provide, so that I can feel more confident and secure on the road.	Non-maleficence(Safety)	Safety	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A1US4LI	A1	US4	Llama 3.1 70b	driver	As a business owner, I want to explore the new market opportunities and revenue streams that Autonomous Vehicles (AVs) can offer, so that I can expand my business and stay competitive in the industry.	Non-maleficence(Safety)	Safety - Reliability	conjunctions	brackets	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A1US5LI	A1	US5	Llama 3.1 70b	business owner	As a fleet manager, I want to reduce fuel consumption and emissions by using Autonomous Vehicles (AVs), so that I can minimize my organization's environmental footprint and save on fuel costs.	N/A	N/A	conjunctions	brackets	no_feature						
A1US6LI	A1	US6	Llama 3.1 70b	manager	As a passenger, I want to enjoy the increased comfort and convenience of Autonomous Vehicles (AVs), including the release of driver time and business opportunities, so that I can be more productive and relaxed during my journey.	Sustainability	Efficiency	conjunctions	brackets	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A1US7LI	A1	US7	Llama 3.1 70b	passenger	As a developer, I want to design and develop AI-powered Autonomous Vehicles (AVs) that can process large-scale data from sensors and devices, so that I can create a more efficient and reliable transportation system.	N/A	N/A	conjunctions	brackets	no_feature						
A1US8LI	A1	US8	Llama 3.1 70b	developer	As a regulator, I want to ensure that Autonomous Vehicles (AVs) meet the highest safety standards and are tested rigorously to minimize risk, so that I can protect the public and ensure a safe and reliable transportation system.	N/A	Scalability	conjunctions	brackets	no_valid_roles	resolution_oriented	Vagueness	Conflict-free		No	No
A1US9LI	A1	US9	Llama 3.1 70b	regulator	As a commuter, I want to benefit from the reduced traffic congestion and parking needs that Autonomous Vehicles (AVs) can provide, so that I can save time and reduce stress during my daily commute.	Non-maleficence(Safety) - Responsibility	Safety - Testability	conjunctions	brackets	Conceptually sound	problem-oriented	Vagueness	Conflict-free		No	No
A1US10LI	A1	US10	Llama 3.1 70b	commuter	As a passenger, I want the AV to detect hazards in real-time using AI sensors, so that my Non-safety is ensured.	N/A	N/A	conjunctions	brackets	no_feature						
A1US1O1	A1	US1	O1_mini	passenger	As a fleet manager, I want to monitor AV performance data via IoT, so that I can proactively manage maintenance.	Non-maleficence(Safety)	Performance	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A1US2O1	A1	US2	O1_mini	manager	As a driver, I want the AV to predict and prevent collisions using AI, so that accidents are significantly reduced.	N/A	Maintainability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
A1US3O1	A1	US3	O1_mini	driver		Non-maleficence(Safety)	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No

A1US4O1	A1	US4	O1_mini	executive	As a transportation executive, I want the AV to optimize fuel consumption with AI, so that operational costs are minimized.	Sustainability	Efficiency	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A1US5O1	A1	US5	O1_mini	passenger	As a passenger, I want the AV to navigate autonomously through traffic using AI and IoT, so that my travel is seamless and stress-free.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A1US6O1	A1	US6	O1_mini	commuter	As a commuter, I want the AV to handle driving tasks autonomously, so that I can use my travel time productively.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A1US7O1	A1	US7	O1_mini	environmentalist	As an environmental advocate, I want the AV to reduce emissions through AI-optimized routes, so that it contributes to a cleaner environment.	Sustainability	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A1US8O1	A1	US8	O1_mini	software engineer	As a software engineer, I want the AV to efficiently process large-scale sensor data using AI and IoT, so that it makes informed decisions quickly.	N/A	Efficiency	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A1US9O1	A1	US9	O1_mini	strategist	As a business strategist, I want to leverage AI and IoT in AVs to explore new market opportunities, so that the company can expand its revenue streams.	N/A	N/A	atomic	minimal	no_feature						
A1US10O1	A1	US10	O1_mini	administrator	As a network administrator, I want the AV to maintain low-latency connectivity through IoT, so that it can communicate effectively for safe operations.	Non-maleficence (Security)	Performance - Security	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A2US1Ge	A2	US1	Gemini_1.5_flash	parent	As a parent, I want a device that can track my child's physical activity and potentially identify aggressive episodes so that I can intervene and provide support.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A2US2Ge	A2	US2	Gemini_1.5_flash	teacher	As a teacher, I want a tool that can discreetly monitor student activity levels in the classroom and alert me to potential aggression so that I can de-escalate situations before they escalate.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	conflict	A2US9Ge	estimatable	No
A2US3Ge	A2	US3	Gemini_1.5_flash	therapist	As a therapist working with aggressive children, I want objective data on their physical activity patterns to track progress in anger management and de-escalation techniques.	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	conflict	A2US9Ge	estimatable	independent
A2US4Ge	A2	US4	Gemini_1.5_flash	researcher	As a researcher studying childhood aggression, I want access to a non-invasive method for collecting real-time data on physical aggression in children so that I can better understand its triggers and consequences.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	conflict	A2US9Ge	estimatable	independent
A2US5Ge	A2	US5	Gemini_1.5_flash	administrator	As a school administrator, I want a system that helps identify students at risk of aggressive behavior so that I can implement targeted interventions and create a safer learning environment.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	conflict	A2US9Ge	No	independent

A2US6Ge	A2	US6	Gemini_1.5_flash	child	As a child with a history of aggression, I want a wearable device that helps me and my parents monitor my activity levels and receive alerts when aggressive behavior might be escalating.	Beneficence	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A2US7Ge	A2	US7	Gemini_1.5_flash	healthcare provider	As a healthcare provider working with children with ADHD, I want a tool that can differentiate between ADHD-related hyperactivity and physical aggression so that I can provide the most appropriate treatment.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A2US8Ge	A2	US8	Gemini_1.5_flash	developer	As a developer of wearable technology for children, I want to integrate machine learning models for aggression detection into my devices to provide parents and educators with additional insights into children's behavior.	Beneficence	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	conflict	A2US9Ge	estimatable	No
A2US9Ge	A2	US9	Gemini_1.5_flash	advocate	As a data privacy advocate, I want assurances that any wearable device used for aggression detection collects data securely and protects children's privacy.	Privacy - Non-maleficence	Privacy - Security	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	source	A2US2Ge, A2US3Ge, A2US4Ge, A2US5Ge, A2US8Ge	estimatable	independent
A2US10Ge	A2	US10	Gemini_1.5_flash	policy maker	As a policymaker, I want to explore the potential of wearable-based aggression detection for early intervention programs and violence prevention initiatives in schools and childcare settings.	N/A	N/A	atomic	minimal	no_feature						
A2US1LI	A2	US1	Llama 3.1 70b	researcher	As a researcher, I want to develop an objective method to track physical-aggressive incidents in children, so that I can identify early warning signs and provide timely interventions.	Beneficence	N/A	atomic	minimal	no_valid_roles	resolution_oriented	General	Conflict-free		No	No
A2US2LI	A2	US2	Llama 3.1 70b	parent	As a parent, I want to know if my child is experiencing aggressive episodes, so that I can provide support and guidance to help them manage their emotions and behaviors.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A2US3LI	A2	US3	Llama 3.1 70b	healthcare provider	As a clinician, I want to use wearable-sensor-derived physical activity data to identify patterns that distinguish physical-aggressive incidents in children, so that I can develop targeted treatments and interventions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A2US4LI	A2	US4	Llama 3.1 70b	analyst	As a data analyst, I want to apply machine learning techniques (e.g., random forest) to analyze physical activity data and identify physical-aggressive incidents with high precision and accuracy, so that I can contribute to the development of an objective detection method.	N/A	N/A	conjunctions	brackets	no_valid_roles	resolution_oriented	Vagueness	Conflict-free		No	No

A2US5LI	A2	US5	Llama 3.1 70b	researcher	As a researcher, I want to collect demographic, anthropometric, and clinical data from participants to better understand the context and contributing factors of physical-aggressive incidents in children, so that I can develop a more comprehensive understanding of the phenomenon.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	independent
A2US6LI	A2	US6	Llama 3.1 70b	developer	As a developer, I want to design a wearable device (e.g., waist-worn activity monitor) that can track physical activity data in children and transmit it to a remote server for analysis, so that I can enable remote monitoring and detection of physical-aggressive incidents.	N/A	N/A	conjunctions	brackets	no_valid_rolesolution_oriented	Unambiguous	free		estimatable	No	No
A2US7LI	A2	US7	Llama 3.1 70b	parent	As a parent, I want to receive alerts and notifications when my child experiences a physical-aggressive incident, so that I can provide immediate support and guidance.	N/A	Reliability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A2US8LI	A2	US8	Llama 3.1 70b	researcher	As a researcher, I want to investigate the effectiveness of the machine learning model in distinguishing physical aggression epochs from non-aggression epochs, so that I can refine and improve the detection algorithm.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	free		No	No	No
A2US9LI	A2	US9	Llama 3.1 70b	healthcare provider	As a clinician, I want to use the sensor-derived feature of vector magnitude (faster triaxial acceleration) to identify early warning signs of physical-aggressive incidents in children, so that I can develop targeted interventions and prevention strategies.	N/A	N/A	atomic	brackets	Conceptually sound	solution_oriented	Unambiguous	free		No	No
A2US10LI	A2	US10	Llama 3.1 70b	system designer	As a system designer, I want to design a scalable and efficient system for remotely detecting and managing aggressive incidents in children, so that I can enable widespread adoption and improve the lives of children and their families.	Beneficence	Scalability - Efficiency	conjunctions	minimal	no_valid_rolesolution_oriented	General	Conflict-free		No	No	No
A2US1O1	A2	US1	O1_mini	parent	As a parent, I want to receive real-time alerts when my child shows aggressive behavior, so I can intervene immediately.	N/A	Performance - Reliability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A2US2O1	A2	US2	O1_mini	teacher	As a teacher, I want daily reports on students' aggression levels from wearable sensors, so I can implement effective classroom strategies.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	conflict	A2US9O1	estimatable	independent
A2US3O1	A2	US3	O1_mini	healthcare provider	As a clinician, I want access to detailed logs of a child's aggressive incidents, so I can create personalized intervention plans.	N/A	Traceability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A2US4O1	A2	US4	O1_mini	researcher	As a researcher, I want to analyze aggregated sensor data from multiple participants, so I can study the triggers of aggression in children.	N/A	N/A	atomic	minimal	no_feature						

A2US5O1	A2	US5	O1_mini	administrator	As a school administrator, I want to monitor overall aggression data across the school, so I can develop policies to enhance safety.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	conflict	A2US9O1	estimatable	independent
A2US6O1	A2	US6	O1_mini	child	As a child with ADHD, I want to wear a comfortable activity monitor, so my behavior is tracked without feeling uncomfortable.	N/A	N/A	atomic	minimal	no_feature						
A2US7O1	A2	US7	O1_mini	data scientist	As a data scientist, I want the machine learning model to accurately distinguish between aggressive and non-aggressive activities, so the system reliably identifies true aggression incidents.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Vagueness	Conflict-free			No	No
A2US8O1	A2	US8	O1_mini	parent	As a guardian, I want to view trends of my child's aggression incidents over time, so I can understand and support their behavioral development.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A2US9O1	A2	US9	O1_mini	officer	As a privacy officer, I want all sensor data to be securely stored and access-controlled, so children's privacy is protected.	Privacy - Security	Security - Privacy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	source	A2US2O1, A2US5O1	estimatable	independent
A2US10O1	A2	US10	O1_mini	developer	As a software developer, I want to integrate sensor data with existing health management systems, so comprehensive support services can be provided seamlessly.	N/A	Interoperability	atomic	minimal	no_valid_rolesolution_oriented	General	Conflict-free			estimatable	No
A3US1Ge	A3	US1	Gemini_1.5_flash	developer	As a social media platform developer, I want a system that can detect aggressive content on my platform in real-time so that I can promote a safer and more positive user experience.	N/A	Performance	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	Conflict-free			No	No
A3US2Ge	A3	US2	Gemini_1.5_flash	moderator	As a content moderator, I want a tool that identifies potentially aggressive tweets with high accuracy so that I can prioritize them for review and take appropriate action.	N/A	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	source	A3US2Ge	No	No
A3US3Ge	A3	US3	Gemini_1.5_flash	researcher	As a researcher studying online behavior, I want access to a system that detects aggression on Twitter in real-time so that I can analyze trends and patterns in online discourse.	N/A	Performance	atomic	minimal	Conceptually sound	problem-oriented	General	conflict	A3US3Ge	No	independent
A3US4Ge	A3	US4	Gemini_1.5_flash	user	As a user who has been targeted by online aggression, I want a platform that can flag aggressive messages so that I can avoid them and report the abuse.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A3US5Ge	A3	US5	Gemini_1.5_flash	mental health professional	As a mental health professional, I want to identify individuals who exhibit aggressive behavior online so that I can offer them support and resources.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A3US6Ge	A3	US6	Gemini_1.5_flash	manager	As a brand manager, I want a system that can detect aggressive mentions of my brand on Twitter so that I can address any negativity and protect our reputation.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A3US7Ge	A3	US7	Gemini_1.5_flash	journalist	As a journalist, I want a tool that helps me identify potential sources of misinformation and disinformation that are spread through aggressive online behavior.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No

A3US8Ge	A3	US8	Gemini_1.5_flash	officer	As a law enforcement officer, I want a system that can detect real-time threats of violence or harm made on social media so that I can intervene and prevent potential crimes.	N/A	Performance - Reliability	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A3US9Ge	A3	US9	Gemini_1.5_flash	developer	As a developer, I want access to the underlying machine learning model and its training data so that I can integrate this real-time aggression detection framework into other applications.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A3US10Ge	A3	US10	Gemini_1.5_flash	person	As a person concerned about online harassment, I want a browser extension or mobile app that filters out potentially aggressive content from my social media feeds so that I can curate a more positive online experience.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A3US1Li	A3	US1	Llama 3.1 70b	administrator	As a social media platform administrator, I want to detect aggressive behavior on Twitter in real-time, so that I can prevent online harassment and maintain a safe online environment.	N/A	Performance - Reliability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A3US2Li	A3	US2	Llama 3.1 70b	data scientist	As a data scientist, I want to develop a machine learning framework that can adapt to new annotated examples and evolve with changing aggressive behavior on social media, so that I can maintain high detection accuracy.	N/A	Adaptability - Retrainability - Accuracy	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		No	independent
A3US3Li	A3	US3	Llama 3.1 70b	researcher	As a researcher, I want to compare the performance of our real-time framework with traditional batch-based machine learning models, so that I can demonstrate the effectiveness of our approach.	N/A	Performance	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A3US4Li	A3	US4	Llama 3.1 70b	administrator	As a system administrator, I want to deploy our framework on a minimal number of commodity machines, so that I can process the entire Twitter Firehose (778 million tweets per day) without excessive resource requirements.	N/A	Efficiency - Scalability	atomic	brackets	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A3US5Li	A3	US5	Llama 3.1 70b	user	As a social media user, I want to feel safe online and know that aggressive behavior is being detected and addressed in real-time, so that I can engage in online conversations without fear of harassment.	N/A	Performance - Reliability	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A3US6Li	A3	US6	Llama 3.1 70b	moderator	As a content moderator, I want to receive alerts and notifications about detected aggressive behavior, sarcasm, racism, and sexism on Twitter, so that I can take prompt action to remove harmful content.	N/A	Performance - Reliability	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A3US7Li	A3	US7	Llama 3.1 70b	developer	As a developer, I want to integrate our real-time framework with existing social media platforms, so that I can provide a seamless user experience and detect aggressive behavior across different platforms.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	No

A3US8LI	A3	US8	Llama 3.1 70b	researcher	As a researcher, I want to analyze the performance of our framework on detecting related behaviors such as sarcasm, racism, and sexism, so that I can refine our approach and improve detection accuracy.	N/A	N/A	conjunctionsexample	no_valid_rolesolution_orientedUnambiguousfree	Conflict-free		estimatableNo		
A3US9LI	A3	US9	Llama 3.1 70b	administrator	As a social media platform administrator, I want to use our framework to identify trends and patterns of aggressive behavior on Twitter, so that I can develop targeted interventions and prevention strategies.	N/A	N/A	atomicminimal	Conceptually soundproblem-orientedUnambiguousfree	Conflict-free		No	No	
A3US10LI	A3	US10	Llama 3.1 70b	system designer	As a system designer, I want to design a scalable and flexible architecture for our real-time framework, so that it can easily integrate with new social media platforms and accommodate increasing volumes of user-generated content.	N/A	Scalability - Flexibility - Interoperability	conjunctionsminimal	no_valid_rolesolution_orientedVagueness	Conflict-free		No	No	
A3US1O1	A3	US1	O1_mini	moderator	As a social media moderator, I want real-time alerts of aggressive tweets, so I can promptly address and remove harmful content.	N/A	Performance	conjunctionsminimal	Conceptually soundproblem-orientedUnambiguousfree	Conflict-free		estimatableindependent		
A3US2O1	A3	US2	O1_mini	administrator	As a platform administrator, I want the aggression detection system to scale efficiently with Twitter's data volume, so it can handle up to 778 million tweets daily using minimal resources.	N/A	Scalability - Efficiency	atomicminimal	Conceptually soundproblem-orientedUnambiguousfree	Conflict-free		No	independent	
A3US3O1	A3	US3	O1_mini	data scientist	As a data scientist, I want the machine learning classifiers to adapt incrementally with new data, so the detection accuracy remains high as aggressive behavior evolves.	N/A	Adaptability - Retrainability	atomicminimal	no_valid_rolesolution_orientedUnambiguousfree	Conflict-free		No	independent	
A3US4O1	A3	US4	O1_mini	researcher	As a researcher, I want to analyze detected aggression, sarcasm, racism, and sexism in real-time, so I can study trends and patterns in online behavior.	N/A	Performance	conjunctionsminimal	Conceptually soundproblem-orientedGeneral	Conflict-free		estimatableNo		
A3US5O1	A3	US5	O1_mini	user	As a user, I want aggressive content to be minimized on my Twitter feed, so my online experience is safer and more positive.	N/A	N/A	atomicminimal	Conceptually soundproblem-orientedUnambiguousfree	Conflict-free		No	No	
A3US6O1	A3	US6	O1_mini	officer	As a compliance officer, I want detailed reports on detected aggressive behavior, so I can ensure the platform adheres to community guidelines and regulations.	Transparency - Responsibility	Accuracy - Completeness - Traceability	atomicminimal	Conceptually soundproblem-orientedUnambiguousfree	Conflict-free		estimatableNo		
A3US7O1	A3	US7	O1_mini	developer	As a developer, I want the framework to integrate seamlessly with existing Twitter infrastructure, so deployment is efficient and does not disrupt service.	N/A	Interoperability	atomicminimal	no_valid_rolesolution_orientedUnambiguousfree	Conflict-free		estimatableindependent		
A3US8O1	A3	US8	O1_mini	content moderator	As a content strategist, I want insights from aggression detection to inform policy updates, so the platform can proactively manage evolving online threats.	Transparency	N/A	atomicminimal	no_feature					

A3US9O1	A3	US9	O1_mini	marketing professional	As a marketer, I want to ensure that aggressive or harmful content does not appear alongside advertisements, so brand safety is maintained on the platform.	N/A	Accuracy - Reliability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A3US10O1	A3	US10	O1_mini	cybersecurity expert	As a cybersecurity analyst, I want the system to detect and report coordinated aggressive campaigns, so I can mitigate large-scale harassment or abuse efforts effectively.	N/A	Accuracy - Reliability	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A4US1Ge	A4	US1	Gemini_1.5_flash	military commander	As a military leader, I want to leverage AI for improved situational awareness and faster decision-making on the battlefield to gain a tactical advantage.	N/A	Performance - Accuracy	conjunctions	minimal	Conceptually sound	problem-oriented	General	conflict	A4US7Ge	No	No
A4US2Ge	A4	US2	Gemini_1.5_flash	cybersecurity expert	As a cybersecurity expert, I want AI tools that can detect and respond to cyberattacks in real-time, protecting critical infrastructure and national security information.	N/A	Performance - Accuracy - Reliability	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
A4US3Ge	A4	US3	Gemini_1.5_flash	analyst	As an intelligence analyst, I want AI to help me analyze vast amounts of data and identify potential threats and emerging conflicts before they escalate.	N/A	Performance - Accuracy	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A4US4Ge	A4	US4	Gemini_1.5_flash	diplomat	As a diplomat working on crisis management, I want AI to assist in simulating different scenarios and predicting potential outcomes of international negotiations.	N/A	Accuracy	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
A4US5Ge	A4	US5	Gemini_1.5_flash	peacekeeper	As a peacekeeper deployed to a conflict zone, I want AI-powered systems that can translate languages in real-time and help me build trust with local communities.	Trust	Performance - Accuracy	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
A4US6Ge	A4	US6	Gemini_1.5_flash	non-proliferation weapons expert	As a non-proliferation expert, I want AI to analyze data on weapons development and identify potential threats of nuclear or biological proliferation.	N/A	N/A	conjunctions	minimal	no_feature						
A4US7Ge	A4	US7	Gemini_1.5_flash	defense contractor	As a defense contractor, I want to develop AI-powered weapons systems that operate with high precision and minimize civilian casualties.	N/A	Accuracy - Reliability	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	source	A4US1Ge	No	No
A4US8Ge	A4	US8	Gemini_1.5_flash	advocate	As a human rights advocate, I want international regulations and ethical guidelines established to prevent the misuse of AI in warfare and ensure accountability for its actions.	Responsibility	N/A	conjunctions	minimal	no_feature						
A4US9Ge	A4	US9	Gemini_1.5_flash	citizen	As a citizen concerned about national security, I want transparency from governments regarding the use of AI in military applications to ensure public trust.	Trust - Transparency	N/A	atomic	minimal	no_feature						
A4US10Ge	A4	US10	Gemini_1.5_flash	researcher	As a researcher in international security, I want to collaborate with policymakers and military leaders to develop a framework for responsible and cooperative development of AI for international security purposes.	Responsibility	N/A	conjunctions	minimal	no_feature						

A4US1LI	A4	US1	Llama 3.1 70b	strategist	As a military strategist, I want to understand the transformative impact of AI on international security, so that I can develop effective responses to emerging threats and opportunities.	N/A	N/A	atomic	minimal	no_feature						
A4US2LI	A4	US2	Llama 3.1 70b	cybersecurity expert	As a security expert, I want to identify the potential risks and challenges associated with AI in the security environment, so that I can mitigate them through cooperation and collaboration.	Non-maleficence(Security) - Responsibility	N/A	conjunctions	minimal	no_feature						
A4US3LI	A4	US3	Llama 3.1 70b	technology developer	As a technologist, I want to design and develop drones that can learn and operate autonomously, using AI and GIS, so that I can enhance military capabilities and decision-making.	N/A	N/A	conjunctions	minimal	no_valid_rolesolution_oriented	General	Conflict-free		No	No	
A4US4LI	A4	US4	Llama 3.1 70b	military commander	As a military commander, I want to leverage AI-powered drones for combat and non-combat operations, so that I can gain a tactical advantage on the ground and improve mission success.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A4US5LI	A4	US5	Llama 3.1 70b	developer	As a developer, I want to integrate AI, C5IRS, and GIS systems to create a seamless and interoperable platform for drone operations, so that I can enhance situational awareness and decision-making.	N/A	Interoperability	conjunctions	minimal	no_valid_rolesolution_oriented	General	Conflict-free		No	No	
A4US6LI	A4	US6	Llama 3.1 70b	researcher	As a researcher, I want to investigate the potential of AI-powered drones to transform enterprise functions, mission support, and operations, so that I can identify new opportunities for military advantage.	N/A	N/A	atomic	minimal	no_feature						
A4US7LI	A4	US7	Llama 3.1 70b	polycymaker	As a policy-maker, I want to develop cooperative frameworks and guidelines for the responsible development and use of AI-powered drones, so that I can minimize risks and promote ethical behavior.	Non-maleficence(Security) - Responsibility	N/A	atomic	minimal	no_feature						
A4US8LI	A4	US8	Llama 3.1 70b	strategist	As a military planner, I want to design scenarios and exercises that incorporate AI-powered drones, so that I can test and evaluate their effectiveness in various operational contexts.	N/A	Testability	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A4US9LI	A4	US9	Llama 3.1 70b	trainer	As a trainer, I want to develop training programs that prepare military personnel to work effectively with AI-powered drones, so that I can ensure seamless human-machine collaboration.	N/A	N/A	atomic	minimal	no_feature						
A4US10LI	A4	US10	Llama 3.1 70b	system architect	As a system architect, I want to design and implement an AI-powered drone system that can adapt to changing circumstances and learn from experience, so that I can create a truly autonomous and effective military capability.	N/A	Adaptability	conjunctions	minimal	no_valid_rolesolution_oriented	General	Conflict-free		No	No	

A4US	O1	A4	US1	O1_mini	military commander	As a military commander, I want autonomous drones to conduct reconnaissance missions, so that I can gather real-time intelligence without risking personnel. As a drone operator, I want AI-driven drones to adapt to changing battlefield conditions, so that missions remain effective under dynamic scenarios. N/A	N/A	Performance	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
	A4US2O1	A4	US2	O1_mini	drone operator	As a GIS specialist, I want drones integrated with GIS systems, so that they can utilize geospatial data for precise navigation and targeting. N/A	N/A	Adaptability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
	A4US3O1	A4	US3	O1_mini	GIS specialist	As a cybersecurity analyst, I want AI-powered drones to detect and respond to cyber threats autonomously, so that our defense systems remain secure against digital attacks. N/A	N/A	Interoperability - Accuracy	atomic	minimal	Conceptually sound	solution_oriented	General	Conflict-free		No	independent
	A4US4O1	A4	US4	O1_mini	cybersecurity expert	As a logistics coordinator, I want autonomous drones to manage supply deliveries in combat zones, so that frontline units receive necessary resources promptly. N/A	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
	A4US5O1	A4	US5	O1_mini	logistics coordinator	As a strategic planner, I want drones equipped with AI to analyze and predict enemy movements, so that I can make informed decisions to counteract threats. N/A	N/A	Efficiency - Reliability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
	A4US6O1	A4	US6	O1_mini	strategist	As a communications officer, I want drones to be integrated with C5ISR systems, so that they can seamlessly share information across all command and control networks. N/A	N/A	Accuracy	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
	A4US7O1	A4	US7	O1_mini	officer	As a field commander, I want AI-enabled drones to perform search and rescue operations, so that injured personnel can be located and evacuated swiftly. N/A	N/A	Interoperability	atomic	minimal	Conceptually sound	solution_oriented	General	Conflict-free		No	No
	A4US8O1	A4	US8	O1_mini	field commander	As an interoperability coordinator, I want drones from different allied forces to communicate and operate cohesively, so that joint missions are more efficient and effective. N/A	N/A	Performance - Accuracy	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
	A4US9O1	A4	US9	O1_mini	interoperability coordinator	As a defense strategist, I want AI-powered drones to learn from each mission, so that their performance improves continuously and adapts to emerging threats. N/A	N/A	Interoperability	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
	A4US10O1	A4	US10	O1_mini	strategist	As a healthcare staff member, I want to efficiently deliver items using the robot to reduce my workload and improve patient care. N/A	N/A	Adaptability - Retrainability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A5US	1Ge	A5	US1	Gemini_1.5_flash	healthcare professional	As a lab technician, I want to easily track the location and status of blood and urine samples using the robot to ensure timely processing. N/A	N/A	Efficiency - Usability	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		estimatable	No
	A5US2Ge	A5	US2	Gemini_1.5_flash	lab technician	As a nurse, I want to request and receive deliveries from the robot to optimize my time and improve patient care. N/A	N/A	Traceability - Performance	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
	A5US3Ge	A5	US3	Gemini_1.5_flash	nurse		N/A	Efficiency - Usability	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No

A5US4Ge	A5	US4	Gemini_1.5_flash	kitchen staff member	As a kitchen staff member, I want to schedule and manage meal deliveries using the robot to streamline kitchen operations. N/A	N/A	Efficiency - Usability	conjunctions		minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	A5US8Ge	estimatable	No
A5US5Ge	A5	US5	Gemini_1.5_flash	patient	As a patient, I want to receive my meals promptly and accurately delivered by the robot to enhance my hospital stay. N/A	N/A	Reliability - Accuracy	conjunctions		minimal	Conceptually sound	problem-oriented	Unambiguous	conflict	A5US8Ge	estimatable	No
A5US6Ge	A5	US6	Gemini_1.5_flash	resident	As a resident, I want to have a positive and easy-to-use experience interacting with the delivery robot. N/A	N/A	Usability	atomic	minimal		Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A5US7Ge	A5	US7	Gemini_1.5_flash	manager	As a facility manager, I want to monitor the robot's performance and utilization to optimize its effectiveness and identify areas for improvement. N/A	N/A	Maintainability	conjunctions		minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A5US8Ge	A5	US8	Gemini_1.5_flash	manager	As a facility manager, I want to ensure the robot operates safely and securely within the facility. Non-maleficence(Safety) - Non-maleficence(Security)		Safety - Security	conjunctions		minimal	Conceptually sound	problem-oriented	Vagueness	source	A5US5Ge	estimatable	No
A5US9Ge	A5	US9	Gemini_1.5_flash	manager	As a facility manager, I want to be able to easily adapt the robot to different areas and tasks within the facility. N/A	N/A	Adaptability - Flexibility	atomic	minimal		Conceptually sound	problem-oriented	General	Conflict-free		No	No
A5US10Ge	A5	US10	Gemini_1.5_flash	system	As the system, I should be able to navigate the facility autonomously and avoid obstacles. N/A	N/A	N/A	conjunctions		minimal	no_valid_role	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A5US1LI	A5	US1	Llama 3.1 70b	lab technician	As a Pathology Laboratory Staff Member, I want to easily and efficiently deliver blood and urine samples using the GoCart robot so that I can reduce my workload and focus on other tasks. N/A	N/A	Efficiency - Usability	atomic	minimal		Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A5US2LI	A5	US2	Llama 3.1 70b	residential care staff member	As a Residential Care Facility Staff Member, I want to use the GoCart robot to deliver meals to residents quickly and accurately so that I can improve the quality of care and resident satisfaction. N/A	N/A	Efficiency - Accuracy - Reliability	conjunctions		minimal	Conceptually sound	problem-oriented	Unambiguous	conflict	A5US6LI	No	No
A5US3LI	A5	US3	Llama 3.1 70b	manager	As a facility manager, I want to monitor the GoCart robot's activity and receive notifications when it encounters any issues or errors so that I can ensure smooth operations and minimize disruptions. N/A	N/A	Maintainability - Reliability	conjunctions		minimal	Conceptually sound	problem-oriented	General	Conflict-free		estimatable	No
A5US4LI	A5	US4	Llama 3.1 70b	healthcare professional	As a Healthcare Worker, I want the GoCart robot to be designed with a user-friendly interface and clear instructions so that I can easily use it without extensive training. N/A	N/A	Usability	atomic	minimal		Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	independent
A5US5LI	A5	US5	Llama 3.1 70b	patient	As a Patient or Resident, I want the GoCart robot to deliver my meals or samples in a timely and efficient manner so that I can receive the care I need without delay. N/A	N/A	Efficiency	atomic	minimal		Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A5US6LI	A5	US6	Llama 3.1 70b	officer	As a Safety and Security Officer, I want the GoCart robot to be equipped with safety features such as collision detection and emergency shutdown so that I can ensure the safety of staff, patients, and residents. Safety	Safety	Safety	conjunctions		example	Conceptually sound	problem-oriented	General	source	A5US2LI	No	independent

A5US7LI	A5	US7	Llama 3.1 70b	IT specialist	As a IT Support Specialist, I want the GoCart robot to be integrated with our existing systems and infrastructure so that I can easily troubleshoot and maintain the robot.	N/A	Maintainability - Interoperability	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-		estimatableNo
A5US8LI	A5	US8	Llama 3.1 70b	quality assurance specialist	As a Quality Improvement Specialist, I want to analyze data and metrics on the GoCart robot's performance and efficiency so that I can identify areas for improvement and optimize its use.	N/A	Performance - Efficiency	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-	estimatableNo
A5US9LI	A5	US9	Llama 3.1 70b	IT specialist	As a Robot Maintenance Technician, I want to easily access and update the GoCart robot's software and firmware so that I can ensure it remains functional and efficient.	N/A	Maintainability - Efficiency	conjunctions	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-		estimatableindependent
A5US10LI	A5	US10	Llama 3.1 70b	Healthcare Administrator	As a Healthcare Administrator, I want to evaluate the cost-benefit analysis of implementing GoCart robots in our facilities so that I can make informed decisions about resource allocation and investments in new technology.	N/A	N/A	atomic	minimal	no_feature				
A5US1O1	A5	US1	O1_mini	nurse	As a nurse, I want the GoCart to deliver blood and urine samples to the pathology lab, so I can save time and reduce manual handling of specimens.	N/A	Efficiency - Safety	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-	estimatableindependent
A5US2O1	A5	US2	O1_mini	dietary staff member	As a dietary staff member, I want the GoCart to transport meals to residents, so I can focus more on meal preparation and patient care.	N/A	Efficiency	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-	estimatableindependent
A5US3O1	A5	US3	O1_mini	manager	As a facility manager, I want to monitor the GoCart's delivery routes in real-time, so I can ensure efficient operation and address any issues promptly.	N/A	Efficiency - Performance	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-	estimatableNo
A5US4O1	A5	US4	O1_mini	lab technician	As a laboratory technician, I want the GoCart to notify me upon arrival of samples, so I can process them without delays.	N/A	Reliability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-	estimatableindependent
A5US5O1	A5	US5	O1_mini	residential care staff member	As a residential care staff member, I want the GoCart to have a user-friendly interface, so I can easily schedule and track meal deliveries.	N/A	Usability	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free	NoNo
A5US6O1	A5	US6	O1_mini	patient	As a patient, I want the GoCart to operate safely around me, so I feel secure and comfortable with its presence in the facility.	Safety	Safety	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free	Noindependent
A5US7O1	A5	US7	O1_mini	IT specialist	As a technician, I want the GoCart to have easy maintenance access, so I can perform repairs and updates without disrupting its functionality.	N/A	Maintainability	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-		estimatableindependent
A5US8O1	A5	US8	O1_mini	officer	As a security officer, I want the GoCart to have secure access controls, so sensitive deliveries are protected from unauthorized access.	Security	Security	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-	estimatableindependent
A5US9O1	A5	US9	O1_mini	manager	As a manager, I want to receive feedback from staff and patients about the GoCart's performance, so I can make informed decisions on necessary improvements.	N/A	Usability - Maintainability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-	Yesindependent

A5US10	O1	A5	US10	O1_mini	IT specialist	As an IT specialist, I want the GoCart to integrate seamlessly with our existing hospital information systems, so data flows smoothly and operations are streamlined.	N/A	Interoperability	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	Conflict-free	estimatable	No		
A6US1	Ge	A6	US1	Gemini_1.5_flash	driver	As a driver using ADAS features, I want the system to anticipate my braking intentions and provide smoother and more natural assistance during forward collision avoidance scenarios.	N/A	Performance - Safety	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	No	No	
A6US2	Ge	A6	US2	Gemini_1.5_flash	engineer	As an engineer developing ADAS systems, I want a reliable method to recognize driver intention and driving behavior, allowing for a more personalized and human-like response from the system.	N/A	Reliability	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free	No	No	
A6US3	Ge	A6	US3	Gemini_1.5_flash	researcher	As a safety researcher evaluating ADAS performance, I want to understand how driver intention recognition using Gaussian Mixture Models (GMM) can improve the effectiveness of forward collision avoidance (FCA) and autonomous emergency braking (AEB) systems.	Transparency	Explainability	atomic	brackets	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No	
A6US4	Ge	A6	US4	Gemini_1.5_flash	car manufacturer	As a car manufacturer integrating ADAS features, I want a cost-effective and efficient method for driver intention recognition that can be implemented and optimized for real-time use in various driving scenarios.	N/A	Efficiency - Performance - Adaptability	conjunctions	minimal	Conceptually sound	problem-oriented	General	conflict	A6US9Ge	No	No
A6US5	Ge	A6	US5	Gemini_1.5_flash	driver	As a driver concerned about automation dependence, I want clear information and transparency about how the ADAS interprets my driving behavior and when it might intervene.	Transparency	Explainability - Transparency	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No	
A6US6	Ge	A6	US6	Gemini_1.5_flash	human-factors specialist	As a human-factors specialist, I want to ensure that driver intention recognition in ADAS prioritizes human control and reduces the potential for automation over-reliance.	Autonomy	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	No	No	
A6US7	Ge	A6	US7	Gemini_1.5_flash	data scientist	As a data scientist working with driving data, I want access to tools and techniques like GMM for accurate driver behavior classification and prediction.	N/A	N/A	atomic	example	no_valid_rolesolution_oriented	General	Conflict-free	No	independent		
A6US8	Ge	A6	US8	Gemini_1.5_flash	participant	As a participant in ADAS testing, I want to feel comfortable and confident in a safe testing environment while providing valuable data on driver intention and behavior.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free	No	independent	
A6US9	Ge	A6	US9	Gemini_1.5_flash	regulator	As a regulator overseeing ADAS safety, I want rigorous testing and validation procedures to ensure that driver intention recognition systems are reliable and contribute to overall driving safety.	N/A	Reliability - Safety - Testability	conjunctions	minimal	Conceptually sound	problem-oriented	Vagueness	source	A6US4Ge	estimatable	independent

A6US10Ge	A6	US10	Gemini_1.5_flash	instructor	As a driving instructor, I want educational resources that explain ADAS features and how driver behavior can influence the system's response, promoting responsible use and driver awareness.	Transparency	Transparency			conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
					As an automotive engineer, I want to design advanced driver assistance systems (ADAS) that take into account driver intention and behavior to improve system performance and acceptance.	N/A	N/A			conjunctions	brackets	no_valid_roles	resolution_oriented	General	Conflict-free		No	No
					As a researcher, I want to develop a method to recognize driver intention and behavior using Gaussian Mixture Model (GMM) to make ADAS more human-like and personalized.	N/A	N/A			conjunctions	brackets	no_valid_roles	resolution_oriented	General	Conflict-free		No	No
					As a driver, I want ADAS to be able to understand my intentions and behaviors, such as braking habits, to provide personalized support and improve my safety on the road.	N/A	N/A			conjunctions	example	Conceptually sound	problem-oriented	General	Conflict-free		No	No
					As a testing engineer, I want to create realistic testing scenarios using a real-time driving simulator to collect data on driver behavior and validate the performance of ADAS.	N/A	Testability			conjunctions	minimal	no_valid_roles	resolution_oriented	General	Conflict-free		estimatable	independent
					As a data analyst, I want to collect and analyze driving data from multiple drivers to train and optimize the Gaussian Mixture Model for driver behavior recognition.	N/A	N/A			conjunctions	minimal	no_valid_roles	resolution_oriented	General	Conflict-free		No	No
					As a control systems engineer, I want to use the recognized driver behavior and intention to optimize the control design of forward collision avoidance (FCA) systems for improved performance.	N/A	N/A			conjunctions	brackets	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		No	No
					As a safety expert, I want to evaluate the performance of personalized ADAS in reducing accidents and improving safety outcomes compared to traditional FCA systems.	Non-maleficence(Safety)	Testability			conjunctions	minimal	no_valid_roles	resolution_oriented	Vagueness	Conflict-free		estimatable	independent
					As a driver, I want to benefit from personalized ADAS that can adapt to my driving style and habits, providing a more comfortable and safe driving experience.	N/A	Adaptability			atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
					As an OEM, I want to integrate personalized ADAS into my vehicles to improve customer satisfaction and differentiate my brand from competitors.	N/A	Interoperability			atomic	minimal	Conceptually sound	solution_oriented	Unambiguous	Conflict-free		estimatable	No
A6US10LI	A6	US10	Llama 3.1 70b	regulator	As a regulatory body, I want to establish standards and guidelines for the development and testing of personalized ADAS to ensure their safety and effectiveness on public roads.	Non-maleficence(Safety) - Responsibility	N/A			conjunctions	minimal	no_feature						

A6US1O1	A6	US1	O1_mini	driver	As a driver, I want the ADAS to adapt to my driving style, so that the system feels more intuitive and personalized to my behavior.	N/A	Adaptability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
					As a safety engineer, I want the ADAS to accurately predict driver intentions, so that forward collision avoidance measures can be activated proactively.											
A6US2O1	A6	US2	O1_mini	safety expert	As a vehicle manufacturer, I want the ADAS to integrate seamlessly with existing vehicle systems, so that it enhances overall vehicle performance without compatibility issues.	N/A	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
					As a developer, I want to use Gaussian Mixture Models to analyze driving data, so that the ADAS can effectively recognize and adapt to different driving behaviors.											
A6US3O1	A6	US3	O1_mini	manufacturer	As a developer, I want to use Gaussian Mixture Models to analyze driving data, so that the ADAS can effectively recognize and adapt to different driving behaviors.	N/A	Interoperability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
					As a tester, I want to simulate various braking scenarios in a driving simulator, so that I can validate the performance and reliability of the personalized ADAS.											
A6US4O1	A6	US4	O1_mini	developer	As a tester, I want to simulate various braking scenarios in a driving simulator, so that I can validate the performance and reliability of the personalized ADAS.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	General		Conflict-free		No	independent
					As a user experience designer, I want the ADAS to provide clear feedback to drivers, so that users understand when and why the system is taking action to avoid collisions.											
A6US5O1	A6	US5	O1_mini	tester	As a user experience designer, I want the ADAS to provide clear feedback to drivers, so that users understand when and why the system is taking action to avoid collisions.	N/A	Testability	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	free	Conflict-free		estimatable	independent
					As a data analyst, I want to collect and analyze driving behavior data, so that I can continuously improve the accuracy of the ADAS's intention recognition.											
A6US6O1	A6	US6	O1_mini	UX designer	As a data analyst, I want to collect and analyze driving behavior data, so that I can continuously improve the accuracy of the ADAS's intention recognition.	Transparency	Explainability - Transparency	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
					As a regulatory compliance officer, I want the personalized ADAS to meet all safety standards, so that the system is legally approved for use in vehicles.											
A6US7O1	A6	US7	O1_mini	analyst	As a regulatory compliance officer, I want the personalized ADAS to meet all safety standards, so that the system is legally approved for use in vehicles.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	free	Conflict-free		Yes	No
					As a fleet manager, I want the ADAS to enhance driver safety and reduce collision risks, so that overall fleet performance and safety metrics improve.											
A6US8O1	A6	US8	O1_mini	officer	As a fleet manager, I want the ADAS to enhance driver safety and reduce collision risks, so that overall fleet performance and safety metrics improve.	Non-maleficence(Safety) - Responsibility	Safety	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
					As a driver, I want the ADAS to learn from my braking patterns, so that autonomous emergency braking is more effective and less intrusive during normal driving conditions.

A11US6Ge	A11	US6	Gemini_1.5_flash	developer	As a system developer, I want the ML-ACS to adapt to different image formats and resolutions commonly used in product packaging and branding. As a security consultant, I want the platform to be secure and prevent unauthorized access to sensitive CDP designs and branding.	N/A	Adaptability - Interoperability	conjunctions	minimal	no_valid_role	problem-oriented	General	Conflict-free		No	independent
A11US7Ge	A11	US7	Gemini_1.5_flash	security expert	training data. As a manufacturer, I want the ML-ACS to integrate with existing design and printing workflows, streamlining the incorporation of secure CDPs into product packaging.	Non-maleficence (Security)	Security	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		estimatable	independent
A11US8Ge	A11	US8	Gemini_1.5_flash	manufacturer	I want the ML-ACS to integrate with existing design and printing workflows, streamlining the incorporation of secure CDPs into product packaging. As a law enforcement officer investigating counterfeiting, I want the system to analyze CDP patterns from seized products and compare them against a database of authentic patterns to identify the source of the counterfeit operation.	N/A	Interoperability	atomic	minimal	no_valid_role	resolution_oriented	Unambiguous	free		No	No
A11US9Ge	A11	US9	Gemini_1.5_flash	officer	As a policymaker, I want to explore how the ML-ACS can be used to strengthen anti-counterfeiting regulations and enforcement mechanisms.	N/A	Scalability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A11US10Ge	A11	US10	Gemini_1.5_flash	policy maker	As a researcher, I want to be able to train the digital twin model using paired data (digital templates and corresponding printed images) so that I can evaluate its performance in generating and predicting printed CDP.	N/A	N/A	atomic	minimal	no_feature						
A11US1LI	A11	US1	Llama 3.1 70b	researcher	As a security expert, I want to use the digital twin model to detect counterfeit products by comparing the predicted printed CDP with the actual printed image, so that I can identify potential counterfeit products.	N/A	N/A	atomic	brackets	no_valid_role	resolution_oriented	Unambiguous	conflict	A11US4LI	estimatable	independent
A11US2LI	A11	US2	Llama 3.1 70b	security expert	As a security expert, I want to use the digital twin model to detect counterfeit products by comparing the predicted printed CDP with the actual printed image, so that I can identify potential counterfeit products. As a developer, I want to be able to modify the architectural design of the digital twin model (e.g., switch from pix2pix to CycleGAN) so that I can experiment with different architectures and evaluate their impact on performance.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		No	No
A11US3LI	A11	US3	Llama 3.1 70b	developer	As a developer, I want to be able to modify the architectural design of the digital twin model (e.g., switch from pix2pix to CycleGAN) so that I can experiment with different architectures and evaluate their impact on performance. As a user, I want to be able to provide unpaired data (digital templates and printed images without matching pairs) to the digital twin model so that I can still train and use the model for generating and predicting printed CDP.	N/A	N/A	atomic	brackets	no_feature						
A11US4LI	A11	US4	Llama 3.1 70b	user	As a user, I want to be able to provide unpaired data (digital templates and printed images without matching pairs) to the digital twin model so that I can still train and use the model for generating and predicting printed CDP. As a researcher, I want to evaluate the performance of the digital twin model using various metrics (e.g., PSNR, SSIM, LPIPS) so that I can understand its strengths and weaknesses.	N/A	Flexibility - Adaptability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	source	A11US1LI	No	No
A11US5LI	A11	US5	Llama 3.1 70b	researcher	As a researcher, I want to evaluate the performance of the digital twin model using various metrics (e.g., PSNR, SSIM, LPIPS) so that I can understand its strengths and weaknesses. As a developer, I want to be able to integrate the digital twin model with existing printing and imaging devices so that I can use the model in practical applications.	N/A	Testability - Performance	atomic	brackets	no_valid_role	resolution_oriented	Unambiguous	free		estimatable	independent
A11US6LI	A11	US6	Llama 3.1 70b	developer	As a developer, I want to be able to integrate the digital twin model with existing printing and imaging devices so that I can use the model in practical applications.	N/A	Interoperability	atomic	minimal	no_valid_role	resolution_oriented	General	Conflict-free		No	No

A11US7LI	A11	US7	Llama 3.1 70b	security expert	As a security expert, I want to use the digital twin model to generate digital templates from printed CDP so that I can create reference images for comparison.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A11US8LI	A11	US8	Llama 3.1 70b	researcher	As a researcher, I want to compare the performance of the digital twin model with state-of-the-art methods for image-to-image translation so that I can evaluate its competitiveness.	N/A	N/A	atomic	minimal	no_feature						
A11US9LI	A11	US9	Llama 3.1 70b	developer	As a developer, I want to access the simulation code and extended results of the digital twin model so that I can reproduce the experiments and extend the model.	N/A	N/A	atomic	minimal	no_feature						
A11US10LI	A11	US10	Llama 3.1 70b	user	As a user, I want to be able to use the digital twin model in a variety of practical setups (e.g., different printing and imaging devices, different types of CDP) so that I can apply the model in various scenarios.	N/A	Adaptability - Flexibility	atomic	brackets	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A11US10I	A11	US1	O1_mini	analyst	As a security engineer, I want to generate accurate printed CDP from digital templates, so that anti-counterfeiting features are reliably produced across various printing devices.	N/A	Accuracy - Reliability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A11US2O1	A11	US2	O1_mini	quality assurance specialist	As a quality assurance specialist, I want the system to support both paired and unpaired training data, so that I can train the digital twin flexibly with available datasets.	N/A	Flexibility - Adaptability	conjunctions	minimal	Conceptually sound	solution_oriented	Unambiguous	Conflict-free		estimatable	independent
A11US3O1	A11	US3	O1_mini	machine learning engineer	As a machine learning engineer, I want the digital twin to use variational approximations of mutual information, so that the encoder and decoder efficiently exchange information within the model.	N/A	Efficiency	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A11US4O1	A11	US4	O1_mini	manager	As a product manager, I want the digital twin architecture to be scalable and adaptable to multiple printing and imaging devices, so that it can be deployed in various practical setups without significant modifications.	N/A	Scalability - Adaptability	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A11US5O1	A11	US5	O1_mini	data scientist	As a data scientist, I want the model to extend architectures like pix2pix and CycleGAN for image-to-image translation, so that I can leverage proven techniques while enhancing CDP modeling capabilities.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A11US6O1	A11	US6	O1_mini	system architect	As a system architect, I want the digital twin to handle hybrid datasets combining paired and unpaired data, so that the model training process is more robust and inclusive of diverse data sources.	N/A	Flexibility - Adaptability	conjunctions	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent

A11US7O1	A11	US7	O1_mini	researcher	As a researcher, I want to evaluate the influence of various architectural factors, metrics, and discriminators on system performance, so that I can optimize the digital twin for accurate CDP generation and prediction.	N/A	Performance - Accuracy	conjunctions	minimal	no_valid_roles	resolution_oriented	General	Conflict-free		No	No
A11US8O1	A11	US8	O1_mini	specialist	As an anti-counterfeiting specialist, I want the digital twin to accurately predict printed CDP back to their digital versions, so that I can effectively verify the authenticity of printed materials.	N/A	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		No	No
A11US9O1	A11	US9	O1_mini	IT specialist	As a technical lead, I want the system to be compatible with any type of printing and imaging devices, so that the digital twin can be universally applied across different technologies and platforms.	N/A	Interoperability - Adaptability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A11US10O1	A11	US10	O1_mini	analyst	As a competitive analyst, I want the digital twin to include comparison capabilities with state-of-the-art image-to-image translation methods, so that I can assess its performance against industry standards.	N/A	N/A	atomic	minimal	Conceptually sound	solution_oriented	General	Conflict-free		No	No
A12US1Ge	A12	US1	Gemini_1.5_flash	officer	As a law enforcement officer, I want to use the FVVI to identify high-risk communities for firearm violence to allocate resources for patrolling and prevention.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	conflict	A12US7Ge	No	independent
A12US2Ge	A12	US2	Gemini_1.5_flash	public health official	As a public health official, I want to use the FVVI to target social programs and interventions in areas with the highest predicted rates of firearm violence.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		No	independent
A12US3Ge	A12	US3	Gemini_1.5_flash	community leader	As a community leader, I want to access the FVVI data for my community to understand the factors contributing to local firearm violence risk.	Transparency	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	conflict	A12US7Ge	estimatable	independent
A12US4Ge	A12	US4	Gemini_1.5_flash	researcher	I want to be able to analyze the FVVI model and identify the population characteristics that have the strongest impact on firearm violence prediction.	N/A	N/A	atomic	minimal	no_valid_role	problem-oriented	Unambiguous	free		estimatable	independent
A12US5Ge	A12	US5	Gemini_1.5_flash	polymaker	As a policymaker, I want to use the FVVI data to inform the development of data-driven strategies for firearm violence prevention.	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	independent
A12US6Ge	A12	US6	Gemini_1.5_flash	data scientist	As a data scientist, I want the system to be able to incorporate additional data sources (e.g., mental health statistics, social media activity) to potentially improve the accuracy of the FVVI.	N/A	N/A	atomic	brackets	no_valid_roles	resolution_oriented	General	Conflict-free		estimatable	independent
A12US7Ge	A12	US7	Gemini_1.5_flash	advocate	As a civil liberties advocate, I want the system to be designed with safeguards to prevent misuse and ensure that individuals are not discriminated against based on their zip code.	Justice/fairness - Non-maleficence	Fairness - Security	atomic	minimal	Conceptually sound	problem-oriented	General	source	A12US1Ge, A12US3Ge, A12US10Ge	estimatable	independent

A12US8Ge	A12	US8	Gemini_1.5_flash	researcher	As a public health researcher, I want the system to be transparent about the methodology used to develop the FVVI and allow for independent validation of the model.	Transparency	Transparency	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A12US9Ge	A12	US9	Gemini_1.5_flash	community leader	As a community organizer, I want the FVVI to be accompanied by resources and guidance for implementing effective prevention programs in high-risk communities.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	independent
A12US10Ge	A12	US10	Gemini_1.5_flash	developer	As a system developer, I want the FVVI to be accessible through a user-friendly interface that allows users to easily visualize risk data at different geographic levels.	N/A	Usability	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	conflict-free	A12US7Ge	estimatable	independent
A12US1LI	A12	US1	Llama 3.1 70b	public health official	As a public health official, I want to access accurate firearm assault data to inform prevention strategies and reduce firearm violence in my community.	N/A	N/A	atomic	minimal	no_feature						
A12US2LI	A12	US2	Llama 3.1 70b	researcher	As a researcher, I want to develop a novel machine-learning algorithm, the Firearm Violence Vulnerability Index (FVVI), to forecast community risk for shooting incidents and identify at-risk populations.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	No
A12US3LI	A12	US3	Llama 3.1 70b	community leader	As a community leader, I want to use the FVVI to predict where rates of firearm violence are highest in my city, so that I can target prevention efforts and allocate resources effectively.	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	independent
A12US4LI	A12	US4	Llama 3.1 70b	analyst	As a data analyst, I want to merge open-access shooting incident data with population characteristics derived from the American Community Survey to create a comprehensive dataset for building the FVVI model.	N/A	Completeness - Interoperability	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A12US5LI	A12	US5	Llama 3.1 70b	machine learning engineer	As a machine learning engineer, I want to use XGBoost, a decision tree-based machine-learning algorithm, to construct the FVVI model and predict shooting incident rates within urban census tracts.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	No
A12US6LI	A12	US6	Llama 3.1 70b	polycymaker	As a policy maker, I want to use the FVVI to identify population characteristics that have the greatest impact on firearm violence, such as historical third grade math scores and having a parent jailed during childhood, so that I can develop targeted interventions.	Beneficence	N/A	atomic	minimal	no_feature						
A12US7LI	A12	US7	Llama 3.1 70b	researcher	As a researcher, I want to evaluate the predictive power of the FVVI model using a test set of unseen data from Chicago, so that I can validate its accuracy and effectiveness.	N/A	Testability - Accuracy	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	No

A12US8LI	A12	US8	Llama 3.1 70b	community leader	As a community leader, I want to use the FVVI to fill gaps in currently available firearm violence data and identify areas of focus for prevention programs, such as social or environmental factors.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
A12US9LI	A12	US9	Llama 3.1 70b	public health official	As a public health official, I want to disseminate the FVVI as a standardized risk tool to enhance firearm violence research and resource allocation, and to inform evidence-based prevention strategies.	N/A	N/A	atomic	minimal	no_feature						
A12US10LI	A12	US10	Llama 3.1 70b	researcher	As a researcher, I want to use the FVVI to analyze the effectiveness of different prevention programs and interventions, and to identify best practices for reducing firearm violence in urban communities.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A12US10I	A12	US1	O1_mini	public health official	As a public health official, I want to use the Firearm Violence Vulnerability Index (FVVI) to identify high-risk communities, so that I can target prevention efforts effectively.	N/A	N/A	atomic	brackets	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A12US2O1	A12	US2	O1_mini	data scientist	As a data scientist, I want to develop the FVVI using XGBoost with population characteristics, so that the model accurately predicts firearm violence rates in urban census tracts.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A12US3O1	A12	US3	O1_mini	policymaker	As a policymaker, I want access to the FVVI's predictions, so that I can allocate resources to areas most vulnerable to firearm violence.	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A12US4O1	A12	US4	O1_mini	community leader	As a community leader, I want to understand the factors influencing the FVVI, so that I can address underlying social issues contributing to firearm violence.	Transparency	N/A	atomic	minimal	no_feature						
A12US5O1	A12	US5	O1_mini	researcher	As a researcher, I want the FVVI to fill data gaps in firearm assault information, so that I can conduct more comprehensive studies on violence prevention.	N/A	N/A	atomic	minimal	no_feature						
A12US6O1	A12	US6	O1_mini	analyst	As a public safety analyst, I want the FVVI to forecast shooting incident rates at a granular geographic level, so that I can implement timely interventions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A12US7O1	A12	US7	O1_mini	grant writer	As a grant writer, I want to utilize the FVVI's standardized risk assessments, so that I can secure funding for targeted violence prevention programs.	N/A	N/A	atomic	minimal	no_feature						
A12US8O1	A12	US8	O1_mini	city planner	As a city planner, I want to integrate FVVI data into urban development plans, so that I can create safer community environments.	Beneficence	Interoperability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
A12US9O1	A12	US9	O1_mini	strategist	As a law enforcement strategist, I want to leverage the FVVI to identify hotspots for firearm violence, so that I can deploy resources more efficiently.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No

A12US10	O1A12	US10	O1_mini	researcher	As a public health researcher, I want the FVVI to incorporate diverse population characteristics, so that the model remains robust and inclusive across different urban settings.	Justice/fairness	Fairness	atomic	minimal	no_valid_role	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A13US1	GeA13	US1	Gemini_1.5_flash	researcher	As a drug researcher, I want to use AI-DrugNet to identify existing drugs that could be repurposed for treating Alzheimer's disease (AD) based on their target interactions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A13US2	GeA13	US2	Gemini_1.5_flash	pharmaceutical company scientist	As a pharmaceutical company scientist, I want the platform to predict potential combinations of existing drugs that may have a synergistic effect in treating AD.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A13US3	GeA13	US3	Gemini_1.5_flash	neurologist	As a neurologist, I want to use AI-DrugNet to explore potential treatment options for my patients with AD that could be readily available based on existing drugs.	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A13US4	GeA13	US4	Gemini_1.5_flash	computational biologist	As a computational biologist, I want to access the underlying network model and data used in AI-DrugNet to understand the rationale behind the predicted drug repurposing or combinations.	Transparency	Explainability - Interpretability	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A13US5	GeA13	US5	Gemini_1.5_flash	data scientist	As a data scientist, I want the platform to allow for the integration of additional disease data and drug-target interaction information to expand its applicability to other neurological or developmental disorders.	N/A	Flexibility - Adaptability	atomic	minimal	no_valid_role	resolution_oriented	General	Conflict-free		estimatable	independent
A13US6	GeA13	US6	Gemini_1.5_flash	regulator	As a regulatory scientist, I want the AI-DrugNet predictions to be accompanied by information on the existing safety and efficacy profiles of the repurposed or combined drugs.	Transparency - Trust - Responsibility	Completeness	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A13US7	GeA13	US7	Gemini_1.5_flash	advocate	As a patient advocate, I want the platform to be transparent about the limitations of AI-based predictions and the need for further clinical trials to validate potential drug repurposing or combinations.	Transparency	Transparency	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A13US8	GeA13	US8	Gemini_1.5_flash	developer	As a system developer, I want AI-DrugNet to be user-friendly and allow researchers to input specific drug targets or disease characteristics for focused drug repurposing analysis.	N/A	Usability	conjunctions	minimal	no_valid_role	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A13US9	GeA13	US9	Gemini_1.5_flash	CEO	As a drug discovery company executive, I want the platform to offer different subscription tiers with access to additional features like detailed network visualizations and prioritized drug recommendations.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A13US10	GeA13	US10	Gemini_1.5_flash	policy maker	As a policymaker, I want to explore how AI-DrugNet can be integrated into drug discovery pipelines to streamline the development of new treatment options for various diseases.	N/A	N/A	atomic	minimal	no_feature

A13US1LI	A13	US1	Llama 3.1 70b	researcher	As a researcher, I want to develop a novel prediction framework to identify potential repurposed drug therapies for Alzheimer's disease (AD), so that I can contribute to the discovery of effective treatments for this complex disease.	N/A	N/A	atomic	brackets	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-free	estimatable	independent									
A13US2LI	A13	US2	Llama 3.1 70b	company	As a pharmaceutical company, I want to use a deep learning-based framework to identify potential drug combinations for AD, so that I can accelerate the development of therapeutic efficacy for this disease.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free	estimatable	No								
A13US3LI	A13	US3	Llama 3.1 70b	neurologist	As a neurologist, I want to access a database of drug-target pair networks that incorporate multiple drug features and target features, so that I can better understand the complex mechanisms behind AD and identify potential treatment options.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free	estimatable	No								
A13US4LI	A13	US4	Llama 3.1 70b	data scientist	As a data scientist, I want to generate integrated features for each drug-combination by incorporating drug-target features and relationship information between drug-drug, target-target, and drug-target, so that I can train a robust AI model for drug discovery.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-free	estimatable	independent									
A13US5LI	A13	US5	Llama 3.1 70b	researcher	As a medical researcher, I want to use an AI-based Drug discovery Network (AI-DrugNet) to identify potential repurposed and combination drug options for AD, so that I can validate their efficacy in clinical trials.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free	No	No								
A13US6LI	A13	US6	Llama 3.1 70b	healthcare provider	As a clinician, I want to access a list of predicted potential drug therapies for AD, ranked by their likelihood of success, so that I can discuss treatment options with my patients and their families.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free	estimatable	No								
A13US7LI	A13	US7	Llama 3.1 70b	researcher	As a researcher, I want to apply the AI-DrugNet framework to identify potential drug combinations for other diseases beyond AD, so that I can explore its broad applicability and generalizability.	N/A	Adaptability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free	No	No								
A13US8LI	A13	US8	Llama 3.1 70b	company	As a pharmaceutical company, I want to use the AI-DrugNet framework to identify potential drug candidates that can be repurposed for AD, so that I can reduce the costs and risks associated with drug development.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free	estimatable	No								
A13US9LI	A13	US9	Llama 3.1 70b	bioinformatician	As a bioinformatician, I want to analyze the AD disease network and identify the key nodes and edges that are associated with disease progression, so that I can provide insights on the underlying mechanisms of AD.	N/A	Interpretability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free	estimatable	independent								

A13US10LI	A13	US10	Llama 3.1 70b	policymaker	As a healthcare policymaker, I want to use the AI-DrugNet framework to inform drug development priorities and resource allocation for AD and other complex diseases, so that I can ensure that patients have access to effective treatments.	N/A	N/A	atomic	minimal	no_feature							
					As a neurologist, I want to utilize the AI-DrugNet framework to identify repurposed drugs for Alzheimer's disease, so that I can offer new therapeutic options to my patients.												
A13US10I	A13	US1	O1_mini	neurologist	As a pharmaceutical researcher, I want to leverage the deep learning-based prediction framework, so that I can discover effective drug combinations for treating complex neurological disorders.	Beneficence	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No	
A13US2O1	A13	US2	O1_mini	researcher	As a data scientist, I want to build and analyze a drug-target pair (DTP) network using multiple drug and target features, so that I can uncover meaningful associations within the AD disease network.	Beneficence	N/A	atomic	minimal	Conceptually sound	solution_oriented	General	Conflict-free		No	No	
A13US3O1	A13	US3	O1_mini	data scientist	As a bioinformatician, I want to integrate drug-drug, target-target, and drug-target relationships into the AI-DrugNet model, so that the framework can generate comprehensive features for accurate drug prediction.	N/A	N/A	atomic	brackets	no_valid_roles	resolution_oriented	General	Conflict-free		No	independent	
A13US4O1	A13	US4	O1_mini	bioinformatician	As a clinical trial coordinator, I want to use AI-DrugNet to identify potential repurposed drug therapies, so that I can design and initiate clinical trials more efficiently for Alzheimer's disease.	N/A	Accuracy - Completeness	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No	
A13US5O1	A13	US5	O1_mini	clinical trial coordinator	As a pharmacologist, I want the prediction framework to generalize to other diseases, so that I can apply the same methodology to discover drug combinations for various complex conditions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No	
A13US6O1	A13	US6	O1_mini	pharmacist	As a healthcare policymaker, I want to adopt the AI-DrugNet framework for drug repurposing, so that I can support cost-effective and timely therapeutic developments for public health.	N/A	Adaptability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No	
A13US7O1	A13	US7	O1_mini	policymaker	As a machine learning engineer, I want to develop and refine the AI-DrugNet model, so that it exhibits robust predictive performance in identifying effective drug therapies.	N/A	Efficiency	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No	
A13US8O1	A13	US8	O1_mini	machine learning engineer	As a medical researcher, I want to explore the associations between drug-target pairs within the AD network, so that I can better understand the mechanisms underlying Alzheimer's disease progression.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent	
A13US9O1	A13	US9	O1_mini	researcher		N/A	Explainability - Interpretability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No	

A13US10O1A13	US10	O1_mini	entrepreneur	As a biotech entrepreneur, I want to implement the AI-DrugNet framework in my startup, so that I can accelerate the discovery of innovative drug therapies for neurological and developmental disorders.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
A14US1Ge A14	US1	Gemini_1.5_flash	taxi dispatcher	As a taxi dispatcher, I want to use the system in real-time to identify areas with high demand for taxi services and dispatch vehicles accordingly.	N/A	Performance	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A14US2Ge A14	US2	Gemini_1.5_flash	city planner	As a city planner, I want to use the system to analyze historical and predicted ridership data to optimize taxi stand locations and traffic flow management.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A14US3Ge A14	US3	Gemini_1.5_flash	manager	As a taxi company manager, I want the system to forecast future ridership trends to optimize fleet size and deployment strategies.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A14US4Ge A14	US4	Gemini_1.5_flash	researcher	As a researcher, I want to access the system's data and models to understand the factors influencing spatiotemporal distribution of taxi and ride-hailing demand (e.g., time of day, borough, special events).	N/A	N/A	atomic	brackets	no_feature						
A14US5Ge A14	US5	Gemini_1.5_flash	public transportation official	As a public transportation official, I want to compare predicted taxi and ride-hailing ridership with public transport usage to plan for integrated transportation solutions.	N/A	N/A	atomic	minimal	no_feature						
A14US6Ge A14	US6	Gemini_1.5_flash	policy maker	As a policymaker, I want to use the system's data to assess the impact of ride-hailing services on traditional taxi ridership and develop regulations that ensure fair competition.	Justice/Fairness	N/A	atomic	minimal	no_feature						
A14US7Ge A14	US7	Gemini_1.5_flash	data scientist	As a data scientist, I want the system to allow for the integration of additional data sources (e.g., weather, special events) to potentially improve the accuracy of ridership predictions.	N/A	Accuracy - Flexibility - Interoperability	atomic	brackets	no_valid_roles	resolution_oriented	Unambiguous	free		estimatable	independent
A14US8Ge A14	US8	Gemini_1.5_flash	consumer	As a consumer, I want to use a mobile app connected to the system to see estimated taxi and ride-hailing wait times in different areas before requesting a ride.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A14US9Ge A14	US9	Gemini_1.5_flash	taxi driver	As a taxi driver, I want the system to provide real-time information on areas with high predicted demand to maximize ridership and earnings.	N/A	Performance	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A14US10GeA14	US10	Gemini_1.5_flash	developer	As a system developer, I want the system to be scalable and efficient to handle large volumes of real-time and historical data for accurate ridership prediction.	N/A	Scalability - Efficiency - Performance	conjunctions	minimal	no_valid_roles	resolution_oriented	Vagueness	Conflict-free		estimatable	independent

A14US1LI	A14	US1	Llama 3.1 70b	city planner	As a city planner, I want to be able to visualize the spatiotemporal distribution of taxi and Uber pick-ups across the five boroughs of NYC, so that I can identify areas of high demand and optimize transportation infrastructure.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	independent
A14US2LI	A14	US2	Llama 3.1 70b	analyst	As a data analyst, I want to use machine learning algorithms such as XGboost and random forest to predict ridership of taxis and Uber combined in NYC, given a time window of one hour and location within zip-code areas, so that I can provide insights to stakeholders on transportation demand.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free	estimatable	No
A14US3LI	A14	US3	Llama 3.1 70b	manager	As a taxi company manager, I want to know the percentage of trips taken by each type of taxi (yellow, green, Uber) in each borough, so that I can optimize my fleet's distribution and services.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	independent
A14US4LI	A14	US4	Llama 3.1 70b	commuter	As a commuter, I want to be able to see the most popular transportation mode in each borough, so that I can plan my trips more effectively.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	independent
A14US5LI	A14	US5	Llama 3.1 70b	city planner	As a city planner, I want to analyze the trend of Uber's growth in each borough, so that I can anticipate its impact on the transportation landscape and make informed decisions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	independent
A14US6LI	A14	US6	Llama 3.1 70b	data scientist	As a data scientist, I want to use the XGboost model to estimate the total number of taxis needed to dispatch to meet demand, given a specific time window and location, so that I can provide actionable insights to taxi companies and city planners.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free	estimatable	No
A14US7LI	A14	US7	Llama 3.1 70b	decision-maker	As a decision-maker, I want to understand how ridership shifts over time in each borough, so that I can make informed decisions about transportation infrastructure and services.	N/A	Interpretability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	independent
A14US8LI	A14	US8	Llama 3.1 70b	taxi dispatcher	As a taxi company dispatcher, I want to know the optimal locations to situate taxis in each borough, so that I can minimize wait times and optimize my fleet's utilization.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A14US9LI	A14	US9	Llama 3.1 70b	researcher	As a researcher, I want to analyze the dataset of over 90 million trips to identify patterns and trends in transportation behavior, so that I can provide insights to stakeholders on how to improve transportation services.	N/A	N/A	atomic	minimal	no_valid_role	problem-oriented	Unambiguous	Conflict-free	estimatable	independent

A14US10LI	A14	US10	Llama 3.1 70b	city planner	As a city planner, I want to use the XGboost model to predict the impact of external factors (e.g. weather, events, road closures) on taxi and Uber ridership, so that I can develop strategies to mitigate their effects and ensure a smooth transportation system.	N/A	N/A	atomic	brackets	Conceptually sound	solution_oriented	Unambiguous	free	Conflict-		estimatable	independent
A14US10I	A14	US1	O1_mini	city planner	As a city planner, I want to use the XGBoost model to predict taxi and Uber ridership across NYC zip codes, so that I can optimize the placement of transportation resources.	N/A	N/A	atomic	minimal	Conceptually sound	solution_oriented	Unambiguous	free	Conflict-		estimatable	independent
A14US2O1	A14	US2	O1_mini	analyst	As a transportation analyst, I want to analyze the spatiotemporal distribution of yellow, green, and Uber pickups, so that I can understand usage patterns across different boroughs.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free	Conflict-		estimatable	No
A14US3O1	A14	US3	O1_mini	manager	As a taxi company manager, I want to leverage predictive insights from the XGBoost model, so that I can determine the optimal number of taxis to dispatch to meet demand.	N/A	N/A	atomic	minimal	Conceptually sound	solution_oriented	Unambiguous	free	Conflict-		estimatable	No
A14US4O1	A14	US4	O1_mini	data scientist	As a data scientist, I want to implement machine learning algorithms like XGBoost and random forest on the ridership dataset, so that I can accurately forecast transportation trends.	N/A	Accuracy	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free	Conflict-		estimatable	independent
A14US5O1	A14	US5	O1_mini	decision-maker	As a decision-maker, I want access to ridership predictions and trends, so that I can make informed policies to enhance transportation services in NYC.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	free	Conflict-		estimatable	No
A14US6O1	A14	US6	O1_mini	manager	As a Uber operations manager, I want to understand the rising trend of Uber pickups in Manhattan and outer boroughs, so that I can strategically expand our services.	N/A	N/A	atomic	minimal	no_feature							
A14US7O1	A14	US7	O1_mini	advocate	As a public transportation advocate, I want to visualize ridership shifts over time, so that I can advocate for balanced transportation options across all boroughs.	Justice/Fairness	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free	Conflict-		estimatable	No
A14US8O1	A14	US8	O1_mini	economist	As a urban economist, I want to study the dominance of yellow taxis in Manhattan and Queens versus green taxis in Brooklyn and the Bronx, so that I can analyze market preferences and economic factors.	N/A	N/A	atomic	minimal	no_feature							
A14US9O1	A14	US9	O1_mini	developer	As a software developer, I want to integrate the XGBoost model's predictions into a user-friendly dashboard, so that stakeholders can easily access and interpret the data.	N/A	Usability - Interoperability	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free	Conflict-		estimatable	independent
A14US10O1	A14	US10	O1_mini	researcher	As a researcher, I want to evaluate the performance of different regression models on the NYC ridership data, so that I can validate the effectiveness of XGBoost in capturing complex feature dependencies.	N/A	Testability - Performance	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free	Conflict-		estimatable	independent

A15US1Ge	A15	US1	Gemini_1.5_flash	As a policymaker, I want to use machine learning to identify communities with high poverty rates so I can target resources and programs effectively.	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A15US2Ge	A15	US2	Gemini_1.5_flash	As a social worker, I want to use a tool that predicts income levels to help me assess the needs of my clients and connect them with appropriate support services.	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A15US3Ge	A15	US3	Gemini_1.5_flash	As a financial advisor, I want to use machine learning models to personalize financial advice for my clients based on their predicted income and lifestyle.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A15US4Ge	A15	US4	Gemini_1.5_flash	As a researcher studying economic inequality, I want to use machine learning to analyze trends and patterns in income distribution across different demographics and regions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A15US5Ge	A15	US5	Gemini_1.5_flash	As a non-profit organization, I want to use income prediction models to identify potential donors and target fundraising campaigns more effectively.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A15US6Ge	A15	US6	Gemini_1.5_flash	As a marketing professional, I want to use machine learning to segment my audience based on predicted income levels and tailor marketing messages accordingly.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A15US7Ge	A15	US7	Gemini_1.5_flash	As a credit risk analyst, I want to use machine learning models to assess the creditworthiness of loan applicants based on their predicted income and other relevant factors.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A15US8Ge	A15	US8	Gemini_1.5_flash	As a human resources professional, I want to use machine learning to identify potential salary discrepancies within my organization and ensure fair compensation practices.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		estimatable	independent
A15US9Ge	A15	US9	Gemini_1.5_flash	As a citizen concerned about income inequality, I want to see the results of machine learning models used to inform policy decisions and promote economic justice.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		estimatable	No
A15US10Ge	A15	US10	Gemini_1.5_flash	As a data scientist, I want to develop and evaluate different machine learning algorithms for income forecasting, ensuring accuracy, fairness, and responsible use of data.	Justice/fairness - Responsibility	Fairness	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent

A15US1LI	A15	US1	Llama 3.1 70b	policy maker	As a policymaker, I want to use machine learning technology to forecast income levels and identify areas of high poverty, so that I can develop targeted interventions to reduce economic inequality.	Justice/fairness - Beneficence	Fairness	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A15US2LI	A15	US2	Llama 3.1 70b	researcher	As a researcher, I want to analyze the relationship between lifestyle factors and income levels using machine learning algorithms, so that I can better understand the root causes of poverty and inequality.	N/A	Interpretability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	independent
A15US3LI	A15	US3	Llama 3.1 70b	social worker	As a social worker, I want to use machine learning models to predict income levels and identify individuals who are at risk of poverty, so that I can provide targeted support and services.	Beneficence	Fairness	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A15US4LI	A15	US4	Llama 3.1 70b	analyst	As a data analyst, I want to develop machine learning models that can accurately predict annual income based on demographic and lifestyle factors, so that I can provide valuable insights to policymakers and researchers.	N/A	Accuracy	atomic	minimal	no_valid_roles	resolution_oriented	Vagueness	Conflict-free	estimatable	independent
A15US5LI	A15	US5	Llama 3.1 70b	government official	As a government official, I want to use machine learning technology to identify areas of high economic inequality and develop policies to address it, so that I can promote sustainable development and financial stability.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A15US6LI	A15	US6	Llama 3.1 70b	non-profit organization	As a non-profit organization, I want to use machine learning models to identify areas of high poverty and develop targeted interventions to reduce poverty and inequality.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A15US7LI	A15	US7	Llama 3.1 70b	researcher	As a researcher, I want to explore the use of data mining strategies to analyze large datasets and identify patterns and relationships between variables that can inform income forecasting models.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free	estimatable	independent
A15US8LI	A15	US8	Llama 3.1 70b	policy maker	As a policymaker, I want to use machine learning models to evaluate the effectiveness of poverty reduction programs and policies, so that I can make informed decisions about resource allocation.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free	estimatable	No
A15US9LI	A15	US9	Llama 3.1 70b	data scientist	As a data scientist, I want to develop machine learning models that can handle large and complex datasets to predict income levels and identify areas of high poverty, so that I can provide accurate and reliable insights.	N/A	Scalability	atomic	minimal	no_valid_roles	resolution_oriented	Vagueness	Conflict-free	estimatable	independent
A15US10LI	A15	US10	Llama 3.1 70b	economist	As an economist, I want to use machine learning models to analyze the impact of economic policies on income inequality and poverty rates, so that I can inform evidence-based policy decisions.	N/A	Transparency	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No

A15US10	A15	US1	O1_mini	analyst	As a government policy analyst, I want to use machine learning models to predict individuals' annual incomes based on their lifestyles, so that I can design targeted poverty reduction programs to address economic inequality.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A15US20	A15	US2	O1_mini	data scientist	As a data scientist, I want to apply data mining strategies to analyze income distribution, so that I can identify key factors contributing to the wealth and income gap in the United States.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A15US30	A15	US3	O1_mini	economist	As an economist, I want to forecast income trends using machine learning, so that I can assess the effectiveness of policies aimed at reducing economic inequality and poverty.	Justice/fairness	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A15US40	A15	US4	O1_mini	social worker	As a social worker, I want access to income prediction insights, so that I can better support individuals and families in need by understanding their financial situations and lifestyle factors.	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		estimatable	No
A15US50	A15	US5	O1_mini	financial advisor	As a financial planner, I want to leverage income forecasting tools, so that I can provide personalized financial advice to clients based on predicted income levels and lifestyle choices.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	source	A15US10O1	estimatable	No
A15US60	A15	US6	O1_mini	polycymaker	As a policy maker, I want to utilize machine learning forecasts of annual income, so that I can implement informed strategies that promote financial stability and reduce poverty across different demographics.	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A15US70	A15	US7	O1_mini	non-profit organization leader	As a nonprofit organization leader, I want to analyze income prediction data, so that I can develop programs that effectively target and alleviate economic disparities within communities.	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A15US80	A15	US8	O1_mini	machine learning engineer	As a machine learning engineer, I want to develop and refine models that predict annual income based on lifestyle data, so that the predictions are accurate and can inform various socio-economic initiatives.	N/A	Accuracy	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A15US90	A15	US9	O1_mini	researcher	As a researcher in economic justice, I want to explore the relationship between lifestyle factors and income levels using data mining techniques, so that I can contribute to understanding and addressing pay uniformity issues.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	General	Conflict-free		No	independent
A15US100	A15	US10	O1_mini	HR specialist	As a human resources manager, I want to use income forecasting tools, so that I can ensure equitable salary structures and identify potential areas of financial improvement within the organization.	Justice/fairness	Fairness	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	conflict	A15US50	estimatable	No

A16US1Ge	A16	US1	Gemini_1.5_flash	pediatrician	As a pediatrician, I want a non-invasive tool that can analyze a newborn's cry and help me identify potential health issues early on.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
A16US2Ge	A16	US2	Gemini_1.5_flash	nurse	As a nurse in the neonatal intensive care unit, I want a system that can continuously monitor newborn cries and alert me to any concerning changes.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A16US3Ge	A16	US3	Gemini_1.5_flash	parent	As a parent of a newborn, I want a device that can help me understand my baby's cries and determine if they need medical attention.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		No	No
A16US4Ge	A16	US4	Gemini_1.5_flash	researcher	As a researcher studying newborn health, I want to use this system to analyze large datasets of infant cries and identify patterns associated with different medical conditions.	N/A	Scalability	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free		estimatable	independent
A16US5Ge	A16	US5	Gemini_1.5_flash	developer	As a developer of medical devices, I want to explore the potential of integrating this technology into wearable devices for continuous monitoring of newborns.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	conflict	A16US10Ge	estimatable	No
A16US6Ge	A16	US6	Gemini_1.5_flash	public health official	As a public health official, I want to use this system to identify newborns at risk of health complications and ensure they receive timely interventions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A16US7Ge	A16	US7	Gemini_1.5_flash	data scientist	As a data scientist, I want to improve the accuracy and efficiency of this system by exploring different machine learning algorithms and feature extraction techniques.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free		estimatable	independent
A16US8Ge	A16	US8	Gemini_1.5_flash	advocate	As an advocate for newborn health, I want to see this system implemented in hospitals and clinics around the world to improve early detection and treatment of health problems in newborns.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A16US9Ge	A16	US9	Gemini_1.5_flash	parent	As a parent who has experienced a newborn with health issues, I want to see this system available to all families to provide peace of mind and early intervention when needed.	Justice/fairness	Accessibility	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		No	No
A16US10Ge	A16	US10	Gemini_1.5_flash	ethicist	As an ethicist, I want to ensure that this system is used responsibly and ethically, with clear guidelines for data privacy and protection of sensitive information.	Privacy - Responsibility	Privacy - Security	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	source	A16US5Ge	estimatable	independent
A16US1LI	A16	US1	Llama 3.1 70b	neonatologist	As a neonatologist, I want to develop a non-invasive newborn cry diagnostic system (NCDS) that uses machine learning techniques to analyze cry audio signals, so that I can identify unhealthy newborns quickly and accurately.	N/A	Accuracy - Performance	atomic	brackets	Conceptually sound	solution_oriented	Unambiguous	free		estimatable	No

A16US2LI	A16	US2	Llama 3.1 70b	researcher	As a researcher, I want to extract feature sets from cry audio signals, including Mel frequency cepstral coefficients (MFCC), auditory-inspired amplitude modulation (AAM) features, and prosody features, so that I can develop a comprehensive diagnostic system.	N/A	N/A	atomic	brackets	no_valid_rolesolution_orientedUnambiguousfree	Conflict-free	estimatable	independent
A16US3LI	A16	US3	Llama 3.1 70b	developer	As a developer, I want to design a system that can fuse multiple feature sets to improve the performance of the NCDS, so that I can increase the accuracy of unhealthy newborn identification.	N/A	N/A	atomic	minimal	no_valid_rolesolution_orientedUnambiguousfree	Conflict-free	estimatable	No
A16US4LI	A16	US4	Llama 3.1 70b	healthcare professional	As a healthcare professional, I want to use a system that can analyze cry audio signals at different levels, including low-level patterns and high-level information, so that I can capture subtle changes in infant cries.	N/A	Completeness	atomic	example	Conceptually soundproblem-orientedVagueness	Conflict-free	estimatable	No
A16US5LI	A16	US5	Llama 3.1 70b	researcher	As a researcher, I want to train probabilistic neural networks and support vector machine algorithms to classify cry audio signals, so that I can develop a robust and reliable diagnostic system.	N/A	N/A	conjunctions	minimal	no_valid_rolesolution_orientedUnambiguousfree	Conflict-free	No	No
A16US6LI	A16	US6	Llama 3.1 70b	developer	As a developer, I want to design a system that can handle real-world problems by including many pathologies in the unhealthy group, so that I can develop a system that is effective in clinical settings.	N/A	N/A	atomic	minimal	Conceptually soundproblem-orientedGeneral	Conflict-free	No	No
A16US7LI	A16	US7	Llama 3.1 70b	neonatologist	As a neonatologist, I want to use a system that can identify unhealthy newborns non-invasively, so that I can provide timely interventions and improve patient outcomes.	N/A	N/A	atomic	minimal	Conceptually soundproblem-orientedVagueness	Conflict-free	No	No
A16US8LI	A16	US8	Llama 3.1 70b	researcher	As a researcher, I want to investigate the usefulness of information at different levels within cry audio signals, so that I can develop a deeper understanding of the relationship between cry patterns and infant health.	Transparency	N/A	atomic	minimal	no_feature			
A16US9LI	A16	US9	Llama 3.1 70b	developer	As a developer, I want to design a system that can achieve an F-measure of over 80% in identifying unhealthy newborns, so that I can develop a highly accurate diagnostic system.	N/A	Accuracy	atomic	minimal	no_valid_rolesolution_orientedUnambiguousfree	Conflict-free	No	No
A16US10LI	A16	US10	Llama 3.1 70b	healthcare professional	As a healthcare professional, I want to use a system that can provide accurate and reliable diagnoses, so that I can provide high-quality care to newborns and improve their health outcomes.	N/A	Accuracy - Reliability	atomic	minimal	Conceptually soundproblem-orientedVagueness	Conflict-free	No	No
A16US1O1	A16	US1	O1_mini	neonatologist	As a neonatal clinician, I want to use the NCDS to non-invasively diagnose unhealthy newborns through their cry audio signals, so that I can quickly identify and address health issues.	N/A	N/A	atomic	minimal	Conceptually soundproblem-orientedGeneral	Conflict-free	No	No

A16US2O1	A16	US2	O1_mini	biomedical engineer	As a biomedical engineer, I want to integrate MFCC, AAM, and prosody feature sets into the NCDS, so that the system can accurately analyze different levels of cry audio signals.	N/A	Accuracy - Completeness	conjunctions	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		No	independent
A16US3O1	A16	US3	O1_mini	machine learning engineer	As a machine learning specialist, I want to apply probabilistic neural networks and support vector machines to the NCDS, so that the model can effectively classify healthy and unhealthy newborns.	N/A	N/A	conjunctions	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A16US4O1	A16	US4	O1_mini	researcher	As a researcher, I want to include diverse pathologies in the unhealthy newborn group, so that the NCDS can handle real-world diagnostic scenarios.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	General	Conflict-free		No	independent
A16US5O1	A16	US5	O1_mini	data scientist	As a data scientist, I want to fuse AAM and MFCC feature sets in the NCDS, so that the system achieves an F-measure of over 80% in diagnosing unhealthy newborns.	N/A	Accuracy	conjunctions	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A16US6O1	A16	US6	O1_mini	healthcare provider	As a healthcare provider, I want the NCDS to operate non-invasively, so that newborns are not subjected to uncomfortable or risky diagnostic procedures.	Non-maleficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A16US7O1	A16	US7	O1_mini	product manager	As a product manager, I want the NCDS to incorporate novel AAM features, so that the system offers innovative diagnostic capabilities not previously available.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	No
A16US8O1	A16	US8	O1_mini	quality assurance specialist	As a quality assurance analyst, I want to validate the NCDS performance using both training and validation datasets, so that I can ensure the system's reliability and accuracy.	N/A	Accuracy - Reliability - Testability	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A16US9O1	A16	US9	O1_mini	advocate	As a parent advocate, I want the NCDS to provide early detection of potential health issues in newborns, so that parents can receive timely interventions and support.	N/A	Performance	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A16US10O1	A16	US10	O1_mini	developer	As a software developer, I want to design the NCDS to handle various feature sets and machine learning models, so that the system remains flexible and scalable for future enhancements.	N/A	N/A	atomic	minimal	no_feature						
A17US1Ge	A17	US1	Gemini_1.5_flash	sleep specialist	As a sleep specialist, I want to use an advanced prediction system to forecast episodes of apnea and hypopnea, enabling me to tailor treatment plans more effectively for individual patients.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A17US2Ge	A17	US2	Gemini_1.5_flash	researcher	As a medical researcher, I need to analyze the effectiveness of using LAMSTAR neural networks and wavelet transform-based preprocessing in predicting sleep disturbances, to advance understanding and technology in sleep medicine.	N/A	N/A	conjunctions	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent

A17US3	Ge A17	US3	Gemini_1.5_flash	biomedical engineer	As a biomedical engineer, I want to develop and refine technologies that integrate physiological signals to predict sleep disorders accurately, enhancing diagnostic tools available to clinicians.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-		estimatable	independent
A17US4	Ge A17	US4	Gemini_1.5_flash	data scientist	As a data scientist in healthcare, I need to employ machine learning models to predict health events from polysomnography data, ensuring that the models are trained and tested to optimize sensitivity and specificity.	N/A	Accuracy - Testability	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-		estimatable	independent
A17US5	Ge A17	US5	Gemini_1.5_flash	clinical trial coordinator	As a clinical trial coordinator, I am interested in conducting a study to validate the effectiveness of the predictive system during non-REM and REM sleep phases, providing empirical support for its clinical use.	N/A	Testability - Performance	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-		estimatable	No
A17US6	Ge A17	US6	Gemini_1.5_flash	developer	As a software developer for medical devices, I need to integrate predictive algorithms into sleep monitoring equipment, allowing for real-time alerts and intervention during sleep studies.	N/A	Interoperability	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-		estimatable	No
A17US7	Ge A17	US7	Gemini_1.5_flash	healthcare policy advisor	As a healthcare policy advisor, I want to understand the potential impact of predictive technologies on managing sleep apnea, to advocate for funding and research that support non-invasive management strategies.	N/A	N/A	atomic	minimal	no_feature					
A17US8	Ge A17	US8	Gemini_1.5_flash	patient	As a patient with obstructive sleep apnea, I am interested in participating in a program that uses this predictive system, hoping to gain better control over my condition and improve my quality of sleep.	N/A	N/A	atomic	minimal	no_feature					
A17US9	Ge A17	US9	Gemini_1.5_flash	marketing professional	As a medical device marketer, I need to highlight the capabilities of our new sleep apnea prediction technology, focusing on its accuracy and the benefits it offers to both patients and clinicians.	N/A	N/A	atomic	minimal	no_feature					
A17US10	GeA17	US10	Gemini_1.5_flash	IT specialist	As a healthcare IT specialist, I am tasked with ensuring that the data from sleep studies are securely handled and that the systems integrating this new predictive technology comply with medical data regulations and privacy laws.	Privacy - Non-maleficence	Security - (Security)Privacy	atomic	minimal	Conceptually sound	problem-oriented	Conflict-		estimatable	independent
A17US1	LI A17	US1	Llama 3.1 70b	researcher	As a researcher, I want to be able to use LAMSTAR artificial neural networks to predict episodes of obstructive apnea and hypopnea in individuals with obstructive sleep apnea syndrome, so that I can evaluate the performance of the system.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-		estimatable	No

A17US2LI	A17	US2	Llama 3.1 70b	healthcare provider	As a clinician, I want to be able to input six physiological signals obtained from polysomnography studies into the prediction system, so that I can get accurate predictions of apnea and hypopnea events. As a system developer, I want to apply wavelet transform-based preprocessing to the physiological signals, so that I can improve the accuracy of the predictions made by the LAMSTAR artificial neural networks.	N/A	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free	Conflict-free		estimatable	No
A17US3LI	A17	US3	Llama 3.1 70b	developer	As a researcher, I want to be able to test the prediction performance of the system during non-REM and REM sleep, so that I can determine the most effective operating environment for the system.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free	Conflict-free		estimatable	independent
A17US4LI	A17	US4	Llama 3.1 70b	researcher	As a clinician, I want to be able to adjust the data segment duration and prediction lead time of the system, so that I can optimize the accuracy of the predictions for individual patients.	N/A	Testability - Performance	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free	Conflict-free		estimatable	No
A17US5LI	A17	US5	Llama 3.1 70b	healthcare provider	As a system developer, I want to be able to measure the performance of the system using average sensitivities, specificities, positive predictive values, and negative predictive values, so that I can evaluate the effectiveness of the system.	N/A	Accuracy - Flexibility	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free	Conflict-free		estimatable	No
A17US6LI	A17	US6	Llama 3.1 70b	developer	As a researcher, I want to be able to identify the most important physiological signals for making accurate and reliable predictions of apnea and hypopnea events, so that I can refine the system to focus on the most critical data.	N/A	Testability - Performance	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free	Conflict-free		estimatable	No
A17US7LI	A17	US7	Llama 3.1 70b	researcher	As a clinician, I want to be able to use the system to predict apnea events up to 60 seconds into the future, so that I can provide timely interventions to patients.	N/A	Accuracy - Interpretability	atomic	minimal	no_valid_roles	resolution_oriented	Vagueness	Conflict-free		estimatable	independent	
A17US8LI	A17	US8	Llama 3.1 70b	healthcare provider	As a system developer, I want to be able to integrate the prediction system with existing polysomnography equipment, so that I can simplify the data collection process and make the system more accessible to clinicians.	N/A	Performance	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free	Conflict-free		estimatable	No
A17US9LI	A17	US9	Llama 3.1 70b	developer	As a researcher, I want to be able to use the prediction system to facilitate improved therapies for obstructive sleep apnea, so that I can improve patient outcomes and quality of life.	N/A	Interoperability	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free	Conflict-free		estimatable	independent
A17US10LI	A17	US10	Llama 3.1 70b	researcher	As a sleep clinician, I want to use the apnea and hypopnea prediction system, so that I can proactively manage and treat patients with obstructive sleep apnea (OSA).	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No	
A17US10I	A17	US1	O1_mini	sleep specialist	sleep apnea (OSA).	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free	Conflict-free		estimatable	No

A21US6LI	A21	US6	Llama 3.1 70b	freelancer	As a freelancer, I want to be evaluated based on my skills and performance, rather than my gender or race, so that I can compete fairly on online freelancing marketplaces.	Justice/fairness	Fairness	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		No	No
A21US7LI	A21	US7	Llama 3.1 70b	researcher	As a researcher, I want to compare the levels of bias on different online freelancing marketplaces, such as TaskRabbit and Fiverr, so that I can understand the variations in bias across platforms.	Justice/fairness	N/A	atomic	minimal	no_feature						

A21US8LI	A21	US8	Llama 3.1 70b	polycymaker	As a policy maker, I want to develop policies to mitigate the effects of racial and gender bias on online freelancing marketplaces so that workers are protected from discrimination.	Justice/fairness - Non-maleficence - Responsibility	N/A	atomic	minimal	no_feature						
A21US9LI	A21	US9	Llama 3.1 70b	freelancer	As a freelancer, I want to be able to report instances of bias or discrimination on online freelancing marketplaces so that action can be taken to address them.	Justice/fairness	Usability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A21US10LI	A21	US10	Llama 3.1 70b	researcher	As a researcher, I want to explore the broader implications of discrimination on online environments and the potential consequences for workers and society as a whole.	Justice/fairness	N/A	atomic	minimal	no_feature						
A21US10I	A21	US1	O1_mini	manager	As an online marketplace manager, I want to analyze racial and gender biases in worker evaluations on TaskRabbit and Fiverr, so that I can implement policies to promote fair employment practices.	Justice/fairness - Non-maleficence - Responsibility	N/A	atomic	minimal	no_feature						
A21US2O1	A21	US2	O1_mini	freelancer	As a freelancer, I want assurance that my gender and race do not negatively impact my customer reviews and search rankings, so that I have equal opportunities to succeed on the platform.	Justice/fairness	Fairness	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A21US3O1	A21	US3	O1_mini	data scientist	As a data scientist, I want to examine the correlation between worker demographics and customer ratings, so that I can identify and address potential biases in the evaluation system.	Justice/fairness - Transparency	Accuracy - Interpretability	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A21US4O1	A21	US4	O1_mini	polycymaker	As a policy maker, I want to understand the extent of discrimination in online freelancing marketplaces, so that I can develop regulations to ensure equitable treatment of all workers.	Justice/fairness - Transparency	N/A	atomic	minimal	no_feature						
A21US5O1	A21	US5	O1_mini	officer	As a diversity and inclusion officer, I want tools to monitor and mitigate bias in worker evaluations, so that the platform fosters an inclusive and fair environment for all users.	Justice/fairness - Non-maleficence	Fairness	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A21US6O1	A21	US6	O1_mini	customer	As a customer support manager, I want to train support staff to recognize and address biased customer reviews, so that workers are treated fairly and discrimination is minimized.	Justice/fairness - Non-maleficence	N/A	atomic	minimal	no_feature						
A21US7O1	A21	US7	O1_mini	UX designer	As a user experience designer, I want to redesign search ranking algorithms to reduce bias based on gender and race, so that all workers have an equal chance of being discovered by clients.	Justice/fairness	Fairness	atomic	minimal	Conceptually sound	solution_oriented	General	Conflict-free		No	No
A21US8O1	A21	US8	O1_mini	advocate	As an anti-discrimination advocate, I want to highlight findings of bias in online freelance marketplaces, so that awareness is raised and corrective actions are encouraged.	Justice/fairness - Transparency	N/A	atomic	minimal	no_feature						

A22US1LI	A22	US1	Llama 3.1 70b	client	As a client, I want to be able to hire the best freelancer for a job on an online labor marketplace so that I can ensure high-quality work.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		No	No
A22US2LI	A22	US2	Llama 3.1 70b	client	As a client, I want to have an effective way to filter through the large number of freelancers applying for a posted job so that I can efficiently identify the most suitable candidate.	N/A	Efficiency - Usability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A22US3LI	A22	US3	Llama 3.1 70b	freelancer	As a freelancer, I want my abilities and skills to be accurately assessed so that I can increase my chances of being hired for jobs that match my expertise.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		No	No
A22US4LI	A22	US4	Llama 3.1 70b	client	As a client, I want to be able to trust the ratings of freelancers on an online labor marketplace so that I can make informed hiring decisions.	Trust	Trust	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A22US5LI	A22	US5	Llama 3.1 70b	administrator	As a system administrator, I want to improve the accuracy of freelancer ratings so that clients can make better hiring decisions.	N/A	Accuracy	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A22US6LI	A22	US6	Llama 3.1 70b	researcher	As a researcher, I want to develop a multidimensional assessment framework that evaluates freelancers on several dimensions so that clients can get a more comprehensive view of a freelancer's abilities.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A22US7LI	A22	US7	Llama 3.1 70b	client	As a client, I want the assessment framework to not only use current information about the freelancer but also utilize their past job performance so that I can get a more accurate picture of their abilities.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A22US8LI	A22	US8	Llama 3.1 70b	administrator	As a system administrator, I want to evaluate the proposed framework on a large dataset of jobs and applicants so that I can determine its effectiveness in improving hiring decisions.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	No
A22US9LI	A22	US9	Llama 3.1 70b	researcher	As a researcher, I want to compare the performance of the proposed framework with a baseline algorithm so that I can quantify the improvement in hiring decisions.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	No
A22US10LI	A22	US10	Llama 3.1 70b	client	As a client, I want to have access to a user-friendly interface that provides a comprehensive assessment of freelancers based on the proposed framework so that I can make informed hiring decisions with ease.	N/A	Usability - Completeness - Interpretability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		estimatable	independent
A22US1O1	A22	US1	O1_mini	client	As a client on an online marketplace, I want a multidimensional assessment framework to evaluate freelancers, so that I can make more informed hiring decisions beyond biased ratings.	N/A	Accuracy - Fairness - Completeness	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No

A22US2O1	A22	US2	O1_mini	freelancer	As a freelance worker, I want my past job performances to be considered in my evaluations, so that my true abilities and work quality are accurately reflected to potential clients. As a platform manager, I want to implement a comprehensive assessment system, so that the hiring process becomes more efficient and trustworthy for both clients and freelancers. As a data scientist, I want to analyze large datasets of job applications and outcomes, so that I can refine the multidimensional assessment framework to better predict freelancer performance. As a hiring manager, I want detailed insights into multiple dimensions of a freelancer's capabilities, so that I can select the most suitable candidate for each specific job requirement. As a quality assurance specialist, I want the assessment framework to outperform baseline algorithms, so that I can ensure the platform consistently provides high-quality freelancer evaluations. As a freelancer, I want a fair and transparent evaluation system, so that my chances of being hired are based on my actual skills and past performance rather than inflated ratings. As a marketing manager for the platform, I want to promote the new assessment framework, so that we can attract both high-quality freelancers and discerning clients seeking reliable hiring tools. As a user experience designer, I want to create an intuitive interface for the assessment framework, so that clients can easily understand and utilize the multidimensional evaluations during their hiring process. As an academic researcher, I want access to the assessment framework's evaluation data, so that I can study its effectiveness in improving hiring outcomes in online labor marketplaces. As a researcher studying search engine algorithms, I want to understand how different search engines prioritize and rank content, including potential biases and favoritism.	N/A	Accuracy - Completeness	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A22US3O1	A22	US3	O1_mini	manager		Beneficence - Trust	Efficiency - Accuracy - Reliability	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		estimatable	independent
A22US4O1	A22	US4	O1_mini	data scientist		N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A22US5O1	A22	US5	O1_mini	manager		N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A22US6O1	A22	US6	O1_mini	quality assurance specialist		N/A	Performance, Consistency, Accuracy	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent

A22US8O1	A22	US8	O1_mini	manager		N/A	N/A	atomic	minimal	no_feature						
A22US9O1	A22	US9	O1_mini	user		N/A	Usability - Explainability - Transparency	atomic	minimal	no_valid_roles	resolution_oriented	Vagueness	Conflict-free		estimatable	independent
A22US10O1	A22	US10	O1_mini	researcher		N/A	N/A	atomic	minimal	no_feature						
A23US1Ge	A23	US1	Gemini_1.5_flash	researcher		Justice/fairness - Transparency	N/A	atomic	minimal	no_feature						

A23US2Ge	A23	US2	Gemini_1.5_flashanalyst	As a journalist or media analyst, I want to compare and contrast the results of different search engines to ensure I'm getting a comprehensive and diverse perspective on a topic.	Justice/fairness	Completeness	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A23US3Ge	A23	US3	Gemini_1.5_flashdeveloper	As a developer of search engine optimization (SEO) tools, I want to analyze how different search engines prioritize different types of content and adjust my strategies accordingly.	N/A	N/A	atomic	brackets	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free	No	independent
A23US4Ge	A23	US4	Gemini_1.5_flashpolicymaker	As a policymaker concerned with online information access, I want to monitor potential biases and manipulation within search engine algorithms and ensure fair and transparent access to information.	Justice/fairness - Transparency - Non-maleficence	N/A	atomic	minimal	no_feature					
A23US5Ge	A23	US5	Gemini_1.5_flashconsumer	As a consumer of online information, I want to be aware of how search engines might influence the information I see and be able to make informed choices about which sources to trust.	Transparency	Explainability - Interpretability	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free	No	No
A23US6Ge	A23	US6	Gemini_1.5_flashdeveloper	As a developer of educational tools, I want to integrate PAWS into my resources to teach students about the potential biases and limitations of search engines.	N/A	N/A	atomic	minimal	no_feature					
A23US7Ge	A23	US7	Gemini_1.5_flashlibrarian	As a librarian or information professional, I want to use PAWS to understand the strengths and weaknesses of different search engines and guide my users towards reliable and diverse information sources.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free	estimatable	No
A23US8Ge	A23	US8	Gemini_1.5_flashdeveloper	As a developer of metasearch engines, I want to use PAWS to aggregate results from different search engines while providing users with transparency about potential biases and emphasis.	Justice/fairness - Transparency	Interoperability - Transparency - Bias	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free	estimatable	No
A23US9Ge	A23	US9	Gemini_1.5_flashdata scientist	As a data scientist, I want to explore new ways to analyze and visualize the differences between search engine results, including using machine learning and natural language processing techniques.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	General	Conflict-free	No	independent
A23US10Ge	A23	US10	Gemini_1.5_flashglobal citizen	As a global citizen, I want to see a more transparent and balanced online information landscape where users can access diverse perspectives and make informed decisions about the information they consume.	Justice/fairness - Transparency	Transparency	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free	No	No
A23US1LI	A23	US1	Llama 3.1 70b researcher	As a researcher, I want to study how search engine algorithms affect the content users see so that I can understand potential biases.	Justice/fairness	N/A	atomic	minimal	no_feature					

A23US2LI	A23	US2	Llama 3.1 70b	developer	As a web developer, I want to create a platform (PAWS) to analyze differences in search engine rankings so that I can help users understand these variations.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	General	Conflict-free		No	independent
A23US3LI	A23	US3	Llama 3.1 70b	user	As a user, I want to know when different search engines favor certain sites or points of view so that I can make informed decisions about the information I consume.	Transparency	Explainability - Interpretability - Bias	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free	estimatable	No
A23US4LI	A23	US4	Llama 3.1 70b	developer	As a developer, I want to integrate the PAWS platform into search engines to enhance transparency and user trust.	Transparency - Trust	Interoperability - Transparency	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	Conflict-free		estimatable	No
A23US5LI	A23	US5	Llama 3.1 70b	researcher	As a researcher, I want to develop techniques to identify the orientation of search results at scale so that I can improve the efficiency of content analysis.	N/A	Efficiency - Scalability	atomic	minimal	no_valid_rolesolution_oriented	General	Conflict-free		No	independent
A23US6LI	A23	US6	Llama 3.1 70b	user	As a user, I want to know if search engines prioritize results that favor their company's products so that I can be aware of potential conflicts of interest.	Transparency	Explainability - Interpretability - Bias	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A23US7LI	A23	US7	Llama 3.1 70b	developer	As a developer, I want to apply the PAWS platform to analyze news search results on Google and Bing so that I can identify any biases or preferences.	Justice/fairness	Bias - Interpretability	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	Conflict-free		estimatable	No
A23US8LI	A23	US8	Llama 3.1 70b	researcher	As a researcher, I want to understand how search engines rank content with advertisements so that I can study their impact on user behavior.	Transparency	N/A	atomic	minimal	no_feature					
A23US9LI	A23	US9	Llama 3.1 70b	developer	As a web developer, I want to ensure the PAWS platform can identify and minimize biases in search engine rankings so that users can access more balanced information.	Justice/fairness	Fairness - Bias	conjunctions	minimal	no_valid_rolesolution_oriented	General	Conflict-free		No	No
A23US10LI	A23	US10	Llama 3.1 70b	researcher	As a researcher, I want to collaborate with other experts to refine the PAWS platform and advance the understanding of search engine biases and content emphasis.	N/A	N/A	atomic	minimal	no_feature					
A23US1O1	A23	US1	O1_mini	user	As a web user, I want to understand how different search engines prioritize content, so that I can make informed decisions about which results to trust and explore.	Transparency - Trust	N/A	atomic	minimal	no_feature					
A23US2O1	A23	US2	O1_mini	advocate	As a transparency advocate, I want to use the PAWS platform to analyze search engine biases, so that I can promote fair and unbiased access to web information.	Justice/fairness - Transparency	Fairness - Bias	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	independent
A23US3O1	A23	US3	O1_mini	data scientist	As a data scientist, I want to leverage PAWS to measure content emphasis across search engines, so that I can study the correlation between search rankings and content features.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	Conflict-free		estimatable	independent

A23US4O1	A23	US4	O1_mini	journalist	As a journalist, I want to identify if search engines favor certain news sites or viewpoints, so that I can report on potential biases in information dissemination. As a search engine developer, I want to utilize insights from PAWS, so that I can improve our ranking algorithms to ensure balanced and fair search results. As a policy maker, I want to understand the influence of search engine rankings on public opinion, so that I can develop regulations that promote transparency and fairness. As a marketing analyst, I want to determine if search engines prioritize pages with our advertisements, so that I can optimize our advertising strategies accordingly. As an academic researcher, I want to apply PAWS to various search engines, so that I can conduct comprehensive studies on search engine behavior and content emphasis. As a competitor in the search engine market, I want to analyze how our ranking algorithms compare to others using PAWS, so that I can identify areas for improvement and differentiation. As a privacy-conscious user, I want to be informed when search engines favor certain points of view or advertisements, so that I can seek a more balanced perspective in my searches. As a researcher, I want to easily discover other researchers with expertise in my field, allowing me to connect and collaborate on projects. As a research administrator, I want to efficiently identify potential reviewers for manuscripts based on their expertise and publication history. As a librarian, I want to provide my users with a powerful tool to explore the academic landscape and discover new research areas. As a student, I want to easily find relevant publications and researchers for my research projects and assignments. As a university administrator, I want to gain insights into the research strengths and collaborations within my institution. As a research funder, I want to identify promising research areas and researchers for potential funding opportunities.	Justice/fairness	Bias - Interpretability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	source	A23US7O1	No	independent

A27US2O1	A27	US2	O1_mini	data scientist	As a product manager for an e-commerce platform, I want to leverage session-based RNN recommendations, so that I can enhance user engagement and increase conversion rates on our website.	N/A	N/A	atomic	minimal	no_valid_role	resolution_oriented	Unambiguous	free	Conflict-		estimatable	independent
A27US3O1	A27	US3	O1_mini	product manager	As a machine learning engineer, I want to incorporate a ranking loss function into our RNN model, so that the recommendations are better aligned with user preferences and .	N/A	Usability - Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free	Conflict-		estimatable	No
A27US4O1	A27	US4	O1_mini	machine learning engineer	As a UX designer, I want the recommendation system to provide timely and relevant suggestions based on current session data, so that users have a seamless and satisfying browsing experience.	N/A	N/A	atomic	minimal	no_valid_role	resolution_oriented	Unambiguous	free	Conflict-		estimatable	independent
A27US5O1	A27	US5	O1_mini	UX designer	As a business analyst, I want to evaluate the performance of RNN-based recommendations against traditional matrix factorization methods, so that I can demonstrate the value of our new approach to stakeholders.	N/A	Usability	atomic	minimal	no_valid_role	problem-oriented	Unambiguous	free	Conflict-		estimatable	independent
A27US6O1	A27	US6	O1_mini	analyst	As a software architect, I want to modify classic RNN architectures to suit session-based recommendation tasks, so that the system remains efficient and scalable for real-time applications.	N/A	N/A	atomic	minimal	no_valid_role	resolution_oriented	Unambiguous	free	Conflict-		estimatable	independent
A27US7O1	A27	US7	O1_mini	software architect	As a marketing strategist, I want to use more accurate session-based recommendations, so that I can tailor promotional campaigns to individual user behaviors and preferences.	N/A	Efficiency - Scalability - Performance	atomic	minimal	no_valid_role	resolution_oriented	Unambiguous	free	Conflict-		estimatable	independent
A27US8O1	A27	US8	O1_mini	strategist		N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free	Conflict-		estimatable	No

A27US9O1	A27	US9	O1_mini	researcher	As a researcher in recommender systems, I want to explore the effectiveness of RNNs on different datasets, so that I can validate the improvements over widely used traditional approaches.	N/A	N/A	atomic	minimal	no_feature							
A27US10O1A27	A27	US10	O1_mini	customer	As a customer support manager, I want the recommendation system to adapt quickly to short-term user interactions, so that I can ensure users receive relevant assistance and product suggestions during their browsing sessions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No	
A28US1Ge	A28	US1	Gemini_1.5_flash	single person	As a single person looking for love, I want a dating recommender system that goes beyond self-reported profiles and considers real-life interactions and compatibility.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No	
A28US2Ge	A28	US2	Gemini_1.5_flash	organizer	As a speed dating organizer, I want a tool that can analyze data from past events to improve match prediction accuracy and increase the success rate of future events.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	conflict	A28US6Ge	estimatable	No	
A28US3Ge	A28	US3	Gemini_1.5_flash	researcher	As a researcher studying human behavior and romantic attraction, I want to explore the potential of using speed dating data to understand what factors contribute to successful matches.	N/A	N/A	atomic	minimal	no_feature							
A28US4Ge	A28	US4	Gemini_1.5_flash	developer	As a developer of dating apps or platforms, I want to integrate real-world data from speed dating events into my system to provide users with more accurate and personalized recommendations.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent	
A28US5Ge	A28	US5	Gemini_1.5_flash	data scientist	As a data scientist, I want to explore the use of machine learning techniques, like random forest regression, to predict compatibility based on objective data from speed dating interactions.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent	
A28US6Ge	A28	US6	Gemini_1.5_flash	user	As a user concerned about data privacy, I want a dating recommender system that uses my data responsibly and transparently, ensuring my information is secure and used ethically.	Privacy - Transparency - Responsibility	Privacy - Security - Transparency	atomic	minimal	Conceptually sound	problem-oriented	General	source	A28US2Ge	No	independent	
A28US7Ge	A28	US7	Gemini_1.5_flash	psychologist	As a psychologist studying dating and relationships, I want to understand how the proposed recommender system based on speed dating data compares to traditional online dating algorithms.	Transparency	N/A	atomic	minimal	no_feature							
A28US8Ge	A28	US8	Gemini_1.5_flash	social scientist studying the impact of technology on dating	As a social scientist studying the impact of technology on dating, I want to explore the potential benefits and drawbacks of using speed dating data in dating recommender systems.	Responsibility	N/A	atomic	minimal	no_feature							

A28US9Ge	A28	US9	Gemini_1.5_flash	dating coach	As a dating coach or relationship expert, I want to use insights from the speed dating-based recommender system to provide clients with personalized advice and strategies for successful dating. As a single person looking for a meaningful connection, I want to use a dating recommender system that helps me find compatible matches based on real-life interaction and mutual interest, rather than solely relying on self-reported information.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		estimatable	No
A28US10Ge	A28	US10	Gemini_1.5_flash	single person	As a dating site user, I want the site to use a more accurate way of assessing my compatibility with potential matches, rather than relying solely on my self-portrayed virtual profile, so that I can increase my chances of finding a good match.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A28US1LI	A28	US1	Llama 3.1 70b	user	As a speed dating event organizer, I want to collect and utilize data from face-to-face interactions to improve the matchmaking process, so that participants can benefit from more effective matches.	N/A	N/A	atomic	minimal	no_feature						
A28US2LI	A28	US2	Llama 3.1 70b	organizer	As a researcher, I want to explore the research gap between traditional online dating recommenders and speed dating data, so that I can develop a more comprehensive and accurate dating recommender system.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		estimatable	No
A28US3LI	A28	US3	Llama 3.1 70b	researcher	As a user of a dating recommender system, I want the system to construct an objective profile library based on ratings from actual dating partners, so that I can trust the accuracy of the matches suggested.	N/A	N/A	atomic	minimal	no_feature						
A28US4LI	A28	US4	Llama 3.1 70b	user	As a developer of a dating recommender system, I want to address the issue of class imbalance in the speed dating dataset, which arises from the low match rate, so that I can improve the overall performance of the system.	Trust	Reliability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A28US5LI	A28	US5	Llama 3.1 70b	developer	As a software engineer, I want to apply SMOTE oversampling to mitigate the class imbalance issue in the speed dating dataset, so that I can improve the accuracy of the matchmaking algorithm.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	free		estimatable	independent	
A28US6LI	A28	US6	Llama 3.1 70b	software engineer	As a researcher, I want to design a random forest regression-based reciprocal recommender that takes into account both the objective profile library and the speed dating data, so that I can increase the match prediction accuracy.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	free		estimatable	No	
A28US7LI	A28	US7	Llama 3.1 70b	researcher		N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	free		estimatable	No	

A28US8O1	A28	US8	O1_mini	quality assurance specialist	As a quality assurance specialist, I want to evaluate the effectiveness of the combined objective profile library and SMOTE oversampling, so that I can ensure our recommender system maintains high performance and accuracy. As a software developer, I want to implement the reciprocal recommender algorithm, so that users receive personalized and mutually compatible match suggestions in real-time.	N/A	Testability	atomic	minimal	no_valid_rolesolution_oriented	Vagueness	Conflict-free		No	independent
A28US9O1	A28	US9	O1_mini	developer	As an academic collaborator, I want access to the objective profile library and match prediction results, so that I can conduct further studies on improving matchmaking algorithms and understanding relationship dynamics.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A28US10O1A28	A28	US10	O1_mini	researcher	As an economic historian, I want to analyze the long-term effects of early life conditions on individuals' later life outcomes, but I need a reliable way to track individuals across historical census records.	N/A	N/A	atomic	minimal	no_feature					
A29US1Ge	A29	US1	Gemini_1.5_flash	economic historian	As a researcher studying social mobility, I want to accurately measure intergenerational mobility across different populations and time periods, requiring precise record linkage.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A29US2Ge	A29	US2	Gemini_1.5_flash	researcher	As a sociologist studying assimilation and discrimination, I want to analyze how individuals' identities and experiences change over time, which necessitates linking them across historical records.	N/A	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A29US3Ge	A29	US3	Gemini_1.5_flash	sociologist studying assimilation and discrimination	As a demographer studying population trends, I want to track individual migration patterns and family structures across generations, requiring accurate record linkage.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A29US4Ge	A29	US4	Gemini_1.5_flash	demographer	As a data scientist working with historical data, I want a user-friendly and efficient method for linking records across different databases, minimizing errors and biases.	N/A	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A29US5Ge	A29	US5	Gemini_1.5_flash	data scientist	As a genealogist researching family history, I want to trace the lives of my ancestors across historical records, but I need a reliable way to match records and avoid mistakes.	N/A	Usability - Efficiency	conjunctions	minimal	no_valid_role	problem-oriented	Unambiguous	Conflict-free	estimatable	independent
A29US6Ge	A29	US6	Gemini_1.5_flash	genealogist	As a policymaker, I want to understand the long-term consequences of social and economic policies, which requires analyzing data on individuals over time, necessitating accurate record linkage.	N/A	Reliability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A29US7Ge	A29	US7	Gemini_1.5_flash	policymaker		N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No

A29US8Ge	A29	US8	Gemini_1.5_flash	developer	As a developer of historical data analysis tools, I want to integrate a robust and transparent record linkage technique into my tools to ensure the accuracy and reliability of research findings.	Transparency	Accuracy - Reliability - Transparency	conjunctions	minimal	no_valid_roles	resolution_oriented	Unambiguous	free		estimatable	No
A29US9Ge	A29	US9	Gemini_1.5_flash	librarian	As a librarian or archivist working with historical data, I want to provide researchers with tools and guidance on how to accurately link records across different sources.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A29US10Ge	A29	US10	Gemini_1.5_flash	historian	As a historian interested in the lives of ordinary people, I want to use historical census data to tell more complete and nuanced stories of individuals and communities, which relies on accurate record linkage.	N/A	Accuracy - Completeness	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A29US1LI	A29	US1	Llama 3.1 70b	economic historian	As an economic historian, I want to be able to accurately link individuals across different historical census databases and over time, so that I can conduct research into intergenerational mobility, early life conditions, assimilation, discrimination, and the returns to education.	N/A	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A29US2LI	A29	US2	Llama 3.1 70b	researcher	As a researcher, I want a standard and transparent census matching technique for constructing linked samples, so that I can confidently rely on the accuracy of my research results and reproduce the methodology across different cases.	Transparency	Accuracy - Reproducibility	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	independent
A29US3LI	A29	US3	Llama 3.1 70b	scholar	As a scholar, I want to be able to efficiently match historical records and produce an unbiased dataset of links for analysis, so that I can take advantage of new research opportunities and make meaningful contributions to the Justice/fairness - field.	Transparency	Efficiency - Fairness	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		No	No
A29US4LI	A29	US4	Llama 3.1 70b	analyst	As a data analyst, I want to apply insights from machine learning classification and text comparison to record linkage of historical data, so that I can leverage the power of algorithms to improve the accuracy and efficiency of linking records.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free		estimatable	independent
A29US5LI	A29	US5	Llama 3.1 70b	researcher	As a researcher, I want to train an algorithm to replicate how a well-trained and consistent researcher would create a linked sample across sources, so that I can minimize both false positives and false negatives in the linking process.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free		estimatable	independent
A29US6LI	A29	US6	Llama 3.1 70b	historian	As a historian, I want to extract a subset of possible matches for each record and use training data to tune a matching algorithm, so that I can account for the inherent noise in historical records and achieve high-quality linking results.	N/A	Performance	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No

A29US7LI	A29	US7	Llama 3.1 70b	scholar	As a scholar, I want to follow a step-by-step procedure for linking historical records, with clear guidance on practical questions such as how large the training data needs to be relative to the sample, so that I can confidently apply the technique to my own research.	Transparency	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		estimatable	No
A29US8LI	A29	US8	Llama 3.1 70b	researcher	As a researcher, I want to be able to link records across different census datasets, such as the 1915 Iowa State Census and the 1940 Federal Census, so that I can study the long-term effects of early life conditions and other historical phenomena.	N/A	N/A	atomic	example	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A29US9LI	A29	US9	Llama 3.1 70b	data scientist	As a data scientist, I want to evaluate the performance of the census matching technique on a specific dataset, such as linking children to their adult selves, so that I can refine the methodology and improve its accuracy.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A29US10LI	A29	US10	Llama 3.1 70b	economic historian	As an economic historian, I want to collaborate with other researchers and share my linked datasets and methodology, so that we can build on each other's work.	N/A	N/A	atomic	minimal	no_feature						
A29US1O1	A29	US1	O1_mini	economic historian	As an economic historian, I want to accurately link historical census records, so that I can study intergenerational mobility and long-term socioeconomic trends.	N/A	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No
A29US2O1	A29	US2	O1_mini	data scientist	As a data scientist, I want to apply machine learning classification and text comparison techniques to record linkage, so that I can minimize false positives and negatives in historical data matching.	N/A	N/A	conjunctions	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A29US3O1	A29	US3	O1_mini	genealogist	As a genealogist, I want a standardized and transparent census matching technique, so that I can consistently replicate record linkages across various historical datasets.	Transparency	Transparency	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A29US4O1	A29	US4	O1_mini	librarian	As a research librarian, I want guidance on the optimal size of training data for record linkage, so that I can support scholars in constructing unbiased linked datasets.	N/A	N/A	atomic	minimal	no_feature						
A29US5O1	A29	US5	O1_mini	developer	As a software developer, I want to implement the described RNN-based approach for session-based recommendations, so that I can provide more accurate suggestions for users with short interaction histories.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A29US6O1	A29	US6	O1_mini	archivist	As an archivist, I want to extract subsets of possible matches for each record, so that researchers can efficiently focus on the most relevant links in large historical databases.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		No	No

A29US7O1	A29	US7	O1_mini	analyst	As a policy analyst, I want access to unbiased linked census datasets, so that I can analyze the long-run effects of early life conditions and discrimination on economic outcomes.	Justice/fairness	N/A	atomic	minimal	no_feature						
A29US8O1	A29	US8	O1_mini	machine learning engineer	As a machine learning engineer, I want to develop and refine algorithms that mimic well-trained researchers in linking historical records, so that the matching process remains accurate and reliable.	N/A	N/A	conjunctions	minimal	no_valid_rolesolution_oriented	Vagueness	Conflict-free		No	independent	
A29US9O1	A29	US9	O1_mini	researcher	As an academic researcher, I want to replicate the census matching technique in different historical contexts, so that I can apply it to a variety of studies on assimilation and educational returns.	N/A	N/A	atomic	minimal	no_feature						
A29US10O1	A29	US10	O1_mini	student	As a doctoral student, I want to utilize the described record linkage method in my research, so that I can explore new avenues in economic history using comprehensive and accurately linked data.	N/A	N/A	atomic	minimal	no_feature						
A30US1Ge	A30	US1	Gemini_1.5_flash	officer	As a law enforcement officer, I want to identify individuals who are at high risk of re-offending so that I can prioritize resources and interventions to prevent future crimes.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	conflict	A30US8Ge	estimatable	No
A30US2Ge	A30	US2	Gemini_1.5_flash	officer	As a parole officer, I want to use data-driven insights to assess the risk of recidivism for each parolee and tailor my supervision and support plans accordingly.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	conflict	A30US8Ge	estimatable	No
A30US3Ge	A30	US3	Gemini_1.5_flash	judge or magistrate	As a judge or magistrate, I want to have access to objective and reliable information about a defendant's risk of re-offending to inform sentencing decisions.	N/A	Reliability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	conflict	A30US8Ge	estimatable	No
A30US4Ge	A30	US4	Gemini_1.5_flash	social worker	As a social worker or rehabilitation specialist, I want to identify individuals who are most likely to benefit from specific rehabilitation programs and services to reduce their risk of recidivism.	Beneficence	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
A30US5Ge	A30	US5	Gemini_1.5_flash	researcher	As a researcher studying criminal justice, I want to develop and evaluate new methods for predicting recidivism using machine learning and other advanced technologies.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	conflict	A30US8Ge	estimatable	independent	
A30US6Ge	A30	US6	Gemini_1.5_flash	data scientist	As a data scientist, I want to build and improve machine learning models that can accurately predict recidivism while minimizing bias and ensuring fairness.	Justice/fairness	Accuracy - Fairness - Bias	atomic	minimal	no_valid_rolesolution_oriented	Vagueness	Conflict-free		No	independent	
A30US7Ge	A30	US7	Gemini_1.5_flash	developer	As a developer of criminal justice software, I want to integrate reliable recidivism prediction tools into my products to support law enforcement and rehabilitation efforts.	N/A	Reliability - Interoperability	atomic	minimal	Conceptually sound	solution_oriented	Unambiguous	conflict	A30US8Ge	estimatable	No

A30US8Ge	A30	US8	Gemini_1.5_flash	advocate	As a civil liberties advocate, I want to ensure that the use of AI in criminal justice is transparent, accountable, and does not exacerbate existing inequalities. As a policymaker, I want to use data-driven insights to inform policies and programs aimed at reducing recidivism and promoting public safety. As a citizen, I want to see a safer society where crime is prevented, and individuals are given the opportunity to successfully reintegrate into the community.	Justice/fairness - Responsibility	Transparency - Fairness	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	source	A30US1Ge, A30US2Ge, A30US3Ge, A30US5Ge, A30US7Ge	estimatable	independent

A32US6O1	A32	US6	O1_mini	instructor	As a software developer, I want to implement an accessible architecture for multi-task learning models, so that my team can efficiently deploy stance detection systems in real-world applications.	N/A	N/A	atomic	minimal	no_feature						
A32US7O1	A32	US7	O1_mini	developer	As a linguist, I want to analyze the interaction between sentiment, stance, and sarcasm in text, so that I can better understand the nuances of human communication in digital environments.	N/A	N/A	atomic	minimal	no_feature						
A32US8O1	A32	US8	O1_mini	linguist	As a marketing analyst, I want to leverage enhanced stance detection models, so that I can gain deeper insights into consumer attitudes and tailor marketing strategies accordingly.	N/A	N/A	atomic	minimal	no_feature						
A32US9O1	A32	US9	O1_mini	researcher	As an AI ethics specialist, I want to evaluate the fairness and bias of multi-task learning models in stance detection, so that I can ensure the ethical deployment of these technologies in diverse linguistic contexts.	Justice/fairness - Non-maleficence	N/A	Fairness - Bias	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A32US10O1	A32	US10	O1_mini	advocate	As a journalist, I want to quickly access and analyze relevant information from past news articles to inform my reporting and provide context for current events.	Justice/fairness - Non-maleficence	N/A	Fairness - Bias	atomic	minimal	Conceptually sound	solution_oriented	Unambiguous	Conflict-free	No	independent
A33US1Ge	A33	US1	Gemini_1.5_flash	journalist	As a researcher studying current events, I want to use a powerful search engine to find specific details and relationships between entities mentioned in news articles.	N/A	Efficiency	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A33US2Ge	A33	US2	Gemini_1.5_flash	researcher		N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No

A33US3Ge	A33	US3	Gemini_1.5_flash	consumer	As a news consumer, I want to be able to search for news articles based on specific events, locations, and people involved, rather than just relying on keywords.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A33US4Ge	A33	US4	Gemini_1.5_flash	librarian	As a librarian or archivist, I want to organize and catalog news articles in a way that makes them easily searchable and accessible to researchers and the public.	N/A	Usability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A33US5Ge	A33	US5	Gemini_1.5_flash	developer	As a developer of news aggregators or search engines, I want to integrate semantic annotations into my platform to provide users with a more comprehensive and nuanced understanding of news content.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A33US6Ge	A33	US6	Gemini_1.5_flash	data scientist	As a data scientist, I want to explore the potential of using Wikidata and other knowledge bases to improve the accuracy and efficiency of semantic annotation and search for news articles.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A33US7Ge	A33	US7	Gemini_1.5_flash	fact-checker	As a fact-checker or verification journalist, I want to use semantic annotations to cross-reference information in news articles with other sources and verify its accuracy.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A33US8Ge	A33	US8	Gemini_1.5_flash	teacher	As a teacher or educator, I want to use semantically annotated news articles to create engaging and informative lesson plans for students.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A33US9Ge	A33	US9	Gemini_1.5_flash	citizen	As a citizen concerned about misinformation and disinformation, I want to be able to access and analyze news articles critically using semantic search to identify potential biases and inconsistencies.	Transparency	Bias - Interpretability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A33US10Ge	A33	US10	Gemini_1.5_flash	global citizen	As a global citizen, I want to see a more informed and engaged public discourse where people can easily access and understand the complex information presented in news articles.	N/A	N/A	atomic	minimal	no_feature						
A33US1LI	A33	US1	Llama 3.1 70b	journalist	As a journalist, I want to be able to quickly and easily find relevant contextual background information when writing a news story, so that I can provide a more informed and comprehensive article.	N/A	Efficiency - Completeness	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A33US2LI	A33	US2	Llama 3.1 70b	news agency	As a news agency, I want to be able to search for precise facts described in news articles, so that I can verify information and ensure the accuracy of our reporting.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A33US3LI	A33	US3	Llama 3.1 70b	researcher	As a researcher, I want to develop a method that can automatically annotate news articles with semantic information, so that I can improve the discoverability and searchability of news content.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent

A33US5O1	A33	US5	O1_mini	researcher	As a researcher, I want to access both keyword-based and structured data searches, so that I can conduct comprehensive studies on the portrayal of different types of events in the media.	N/A	Completeness	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A33US6O1	A33	US6	O1_mini	consumer	As a news consumer, I want to use a semantic search engine to filter news articles by specific event properties, so that I can quickly find information relevant to my interests and needs.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A33US7O1	A33	US7	O1_mini	content moderator	As a content manager, I want automated semantic annotations for incoming news articles, so that our team can maintain a well-organized and easily searchable content library.	N/A	Usability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A33US8O1	A33	US8	O1_mini	knowledge base specialist	As a knowledge base specialist, I want to leverage Wikidata for enriching news articles with accurate and up-to-date semantic information, so that the integrity and reliability of our news content are enhanced.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		estimatable	No
A33US9O1	A33	US9	O1_mini	librarian	As a librarian, I want to provide journalists and researchers with access to a semantic search engine, so that they can efficiently locate and utilize precise information from a vast array of news sources.	N/A	Efficiency	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A33US10O1A33	A33	US10	O1_mini	product manager	As a product manager for a news aggregation service, I want to implement a semantic search engine that supports both keyword and structured data searches, so that we can offer users a powerful tool for discovering and exploring news content.	N/A	N/A	atomic	minimal	Conceptually sound	solution_oriented	General	Conflict-free		No	No
A34US1Ge	A34	US1	Gemini_1.5_flash	analyst	As a cybersecurity analyst, I want to utilize a DNN-based IDS that can detect and classify new and unpredictable cyberattacks automatically, ensuring our network remains secure against evolving threats.	N/A	Accuracy - Security - Adaptability	conjunctions	minimal	Conceptually sound	solution_oriented	General	Conflict-free		No	No
A34US2Ge	A34	US2	Gemini_1.5_flash	machine learning engineer	As a machine learning engineer, I need to experiment with various DNN architectures and hyperparameters to determine the most effective network topology and parameters for detecting cyberattacks, using datasets like KDDCup 99.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A34US3Ge	A34	US3	Gemini_1.5_flash	data scientist	As a data scientist, I want to benchmark the performance of our DNN model against other classical machine learning classifiers across multiple publicly available malware datasets, to ensure we are using the best approach.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	General	Conflict-free		estimatable	independent

A34US4Ge	A34	US4	Gemini_1.5_flash	developer	As a software developer, I need to implement a scalable IDS that can handle large volumes of network traffic and rapidly evolving attack methods without degradation in performance. As a project manager in cybersecurity, I aim to oversee a research project that systematically updates and benchmarks malware datasets, ensuring that our IDS remains effective against the latest threats.	N/A	Scalability	atomic	minimal	no_valid_rolesolution_oriented	Vagueness	Conflict-free		estimatable	No
A34US5Ge	A34	US5	Gemini_1.5_flash	product manager	As an IDS user, I want the system to continuously learn and adapt to changes in network behavior and new types of cyberattacks, ensuring robust protection over time.	N/A	N/A	conjunctions	minimal	no_valid_rolesolution_oriented	General	Conflict-free		No	No
A34US6Ge	A34	US6	Gemini_1.5_flash	user	As a quality assurance engineer, I need to conduct comprehensive testing on the IDS to validate its effectiveness in real-world scenarios and across different datasets, including NSL-KDD and CICIDS 2017.	N/A	Adaptability - Reliability - Security	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free	No	No
A34US7Ge	A34	US7	Gemini_1.5_flash	quality assurance specialist	As a regulatory compliance officer, I want to ensure that our IDS meets all cybersecurity standards and regulations, providing dependable security without compromising compliance.	N/A	Testability	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	Conflict-free		estimatable	No
A34US8Ge	A34	US8	Gemini_1.5_flash	officer	As a researcher, I am interested in publishing the findings from our evaluations of various machine learning techniques on IDS, contributing to the cybersecurity community's understanding of effective defenses against malware.	Non-maleficence (Security) - Responsibility	Security - Reliability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free	No	independent
A34US9Ge	A34	US9	Gemini_1.5_flash	researcher	As a system administrator, I want to easily integrate the DNN-based IDS into our existing network infrastructure, ensuring minimal disruption and maximum protection.	N/A	N/A	atomic	minimal	no_feature					
A34US10Ge	A34	US10	Gemini_1.5_flash	administrator	As a cybersecurity researcher, I want to develop an intrusion detection system (IDS) that can detect and classify cyberattacks in a timely and automatic manner, so that I can protect networks and hosts from malicious activities.	Non-maleficence (Security) -	Interoperability - Security	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free	estimatable	No
A34US1LI	A34	US1	Llama 3.1 70b	researcher	As a security professional, I want to leverage machine learning techniques to build an effective IDS that can adapt to the constantly changing nature of malware and cyberattacks, so that I can stay ahead of attackers.	N/A	N/A	conjunctions	brackets	no_valid_rolesolution_oriented	Vagueness	Conflict-free		No	No
A34US2LI	A34	US2	Llama 3.1 70b	security professional		N/A	Adaptability - Accuracy - Performance	atomic	minimal	Conceptually sound	solution_oriented	General	Conflict-free	No	No

A34US3LI	A34	US3	Llama 3.1 70b	developer	As a developer, I want to explore the use of deep neural networks (DNNs) to develop a flexible and effective IDS that can detect and classify unforeseen and unpredictable cyberattacks, so that I can improve the accuracy and efficiency of threat detection.	N/A	Efficiency - Flexibility	atomic	minimal	no_valid_rolesolution_oriented	Vagueness	Conflict-free		estimatable	independent
A34US4LI	A34	US4	Llama 3.1 70b	researcher	As a researcher, I want to evaluate the performance of various machine learning algorithms on publicly available malware datasets, so that I can identify the best algorithm for detecting future cyberattacks.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A34US5LI	A34	US5	Llama 3.1 70b	security professional	As a cybersecurity expert, I want to analyze the performance of different machine learning models on various datasets, so that I can understand the strengths and weaknesses of each approach and choose the most effective one.	N/A	N/A	atomic	minimal	Conceptually sound	solution_oriented	General	Conflict-free	estimatable	No
A34US6LI	A34	US6	Llama 3.1 70b	developer	I want to optimize the network parameters and topology of DNNs for IDS, so that I can improve the accuracy and efficiency of threat detection.	N/A	Accuracy - Efficiency	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	Conflict-free		No	No
A34US7LI	A34	US7	Llama 3.1 70b	researcher	As a researcher, I want to conduct a comprehensive evaluation of experiments on various publicly available benchmark malware datasets, so that I can benchmark the performance of different machine learning algorithms.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A34US8LI	A34	US8	Llama 3.1 70b	security professional	As a security professional, I want to stay informed about the latest developments in IDS technology, so that I can continuously improve our defense strategies against evolving cyber threats.	N/A	N/A	atomic	minimal	no_feature					
A34US9LI	A34	US9	Llama 3.1 70b	data scientist	As a data scientist, I want to contribute to the systematic updating and benchmarking of publicly available malware datasets, so that I can promote collaboration and knowledge sharing in the field of intrusion detection.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	Conflict-free		No	independent
A34US10LI	A34	US10	Llama 3.1 70b	decision-maker	As a decision-maker in an organization, I want to invest in research and development efforts aimed at exploring innovative approaches like DNNs for intrusion detection, ensuring that our systems are equipped to defend against evolving cyber threats effectively.	N/A	N/A	atomic	minimal	no_feature					
A34US10I	A34	US1	O1_mini	analyst	As a cybersecurity analyst, I want to utilize deep neural networks for intrusion detection, so that I can accurately identify and classify evolving cyberattacks in real-time.	N/A	Performance	atomic	minimal	Conceptually sound	solution_oriented	Unambiguous	Conflict-free	No	No

A34US2O1	A34	US2	O1_mini	data scientist	As a data scientist, I want to benchmark various machine learning algorithms on multiple public malware datasets, so that I can determine the most effective models for detecting future threats.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-free			estimatable	independent
A34US3O1	A34	US3	O1_mini	administrator	As a network administrator, I want an IDS that scales efficiently with large volumes of data, so that my organization remains protected against high-volume and sophisticated cyberattacks.	Non-maleficence	Scalability - (Security)Performance	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free		estimatable	independent
A34US4O1	A34	US4	O1_mini	researcher	As a security researcher, I want to systematically update and evaluate malware datasets, so that my studies reflect the latest attack methods and improve IDS accuracy.	N/A	N/A	atomic	minimal	no_feature						
A34US5O1	A34	US5	O1_mini	engineer	As a machine learning engineer, I want to optimize DNN hyperparameters using methods applied to the KDDCup 99 dataset, so that my IDS models achieve optimal performance and reliability.	N/A	Performance - Reliability	atomic	not_minimal	no_valid_rolesolution_oriented	Vagueness	Conflict-free		No		independent
A34US6O1	A34	US6	O1_mini	cybersecurity expert	As a cybersecurity team leader, I want comprehensive evaluations of DNNs and classical classifiers across various benchmark datasets, so that I can select the best algorithm for our organization's intrusion detection needs.	N/A	Testability - Performance	atomic	minimal	Conceptually sound	solution_oriented	Unambiguousfree	Conflict-free		estimatable	independent
A34US7O1	A34	US7	O1_mini	developer	As a software developer, I want to implement flexible DNN models that learn high-dimensional feature representations, so that my IDS can adapt to dynamic network behaviors and rapidly evolving attacks.	N/A	Adaptability - Flexibility	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-free		estimatable	No	
A34US8O1	A34	US8	O1_mini	researcher	As an academic researcher, I want to conduct detailed performance analyses of machine learning algorithms on datasets like NSL-KDD, UNSW-NB15, Kyoto, WSN-DS, and CICIDS 2017, so that I can contribute to advancing the field of intrusion detection.	N/A	N/A	atomic	minimal	no_feature						
A34US9O1	A34	US9	O1_mini	manager	As a security operations center (SOC) manager, I want an automated IDS that classifies cyberattacks promptly, so that my team can respond swiftly and effectively to security incidents.	N/A	Performance	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		No	No
A34US10O1	A34	US10	O1_mini	policymaker	As a policy maker, I want evidence-based studies identifying the best-performing IDS algorithms across various datasets, so that I can recommend robust cybersecurity measures for organizations to implement.	N/A	N/A	atomic	minimal	no_feature						
A35US1Ge	A35	US1	Gemini_1.5_flash	manager	As a sales manager in a wholesale company, I want to accurately predict future sales for each product, customer, and market to optimize inventory levels and sales strategies.	N/A	Accuracy	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free		estimatable	No

A35US2Ge	A35	US2	Gemini_1.5_flash	manager	As a logistics manager in a wholesale company, I want to receive accurate sales forecasts to plan transportation and warehousing resources efficiently, minimizing costs and delays.	N/A	Accuracy - Efficiency	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A35US3Ge	A35	US3	Gemini_1.5_flash	analyst	As a financial analyst in a wholesale company, I want to use sales predictions to create accurate financial forecasts and budget allocations for future operations.	N/A	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A35US4Ge	A35	US4	Gemini_1.5_flash	product manager	As a product manager in a wholesale company, I want to use sales data to identify trends and patterns in customer demand, informing product development and marketing decisions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A35US5Ge	A35	US5	Gemini_1.5_flash	data scientist	As a data scientist in a wholesale company, I want to build and maintain a data mart and ARIMA models for sales prediction, ensuring data quality and model accuracy.	N/A	Accuracy - Maintainability	conjunctions	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A35US6Ge	A35	US6	Gemini_1.5_flash	analyst	As a business intelligence analyst in a wholesale company, I want to visualize and analyze sales predictions to identify opportunities for growth and areas for improvement.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A35US7Ge	A35	US7	Gemini_1.5_flash	customer service representative	As a customer service representative in a wholesale company, I want to use sales predictions to anticipate customer needs and provide more proactive and personalized service.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A35US8Ge	A35	US8	Gemini_1.5_flash	manager	As a marketing manager in a wholesale company, I want to use sales predictions to target marketing campaigns more effectively and maximize return on investment.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A35US9Ge	A35	US9	Gemini_1.5_flash	CEO	As a CEO of a wholesale company, I want to use sales predictions to make informed strategic decisions about resource allocation, expansion, and new product development.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A35US10Ge	A35	US10	Gemini_1.5_flash	shareholder of a wholesale company	As a shareholder of a wholesale company, I want to have access to accurate and reliable sales predictions to assess the financial health and future prospects of the company.	N/A	Accuracy - Reliability	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		No	No
A35US1LI	A35	US1	Llama 3.1 70b	company	As a wholesale company, I want to optimize my organizational environment to minimize costs and maximize revenue, so I need accurate sales predictions to inform my planning process.	N/A	Accuracy	conjunctions	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A35US2LI	A35	US2	Llama 3.1 70b	manager	As a logistics manager, I want to use precise sales predictions to optimize both sales and logistics processes, so I can reduce waste and improve efficiency.	N/A	Accuracy	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No

A35US3LI	A35	US3	Llama 3.1 70b	analyst	As a sales analyst, I want to track sales towards a customer using a data mart built on top of a data warehouse, so I can make data-driven decisions about customer relationships and sales strategies. N/A	Traceability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No	
				developer	As a business intelligence developer, I want to design a data mart that can handle daily loads of outgoing invoices and uninvoiced shipments data, so I can provide timely and accurate sales predictions. N/A				no_valid_rolesolution_oriented		Unambiguous	Conflict-free				
				forecasting expert	As a forecasting expert, I want to use the ARIMA model to make predictions about sales trends, so I can provide actionable insights to business stakeholders. N/A				no_valid_rolesolution_oriented		Unambiguous	Conflict-free				
				manager	As a sales manager, I want to aggregate sales data on a weekly level, so I can identify trends and patterns that inform my sales strategies.N/A				Conceptually sound	problem-oriented	Unambiguous	Conflict-free				
				product manager	As a product manager, I want to track sales data for each product, including sales market, customer, quantity, and date, so I can make informed decisions about product development and marketing. N/A				Conceptually sound	problem-oriented	Unambiguous	Conflict-free				
				analyst	As a data analyst, I want to prepare data for prediction purposes, so I need to ensure that the data is clean, complete, and accurate. N/A				no_valid_rolesolution_oriented		Unambiguous	Conflict-free				
				user	As a business user, I want to use sales predictions to identify opportunities for growth and revenue enhancement, so I can make strategic decisions about investments and resource allocation. N/A				Conceptually sound	problem-oriented	Unambiguous	Conflict-free				
				IT specialist	As an IT manager, I want to ensure that the data mart and prediction system are scalable and reliable, so I can provide a robust platform for sales forecasting and analysis. N/A				Conceptually sound	solution_oriented	Vagueness	Conflict-free				
				manager	As a sales manager, I want accurate sales predictions using the ARIMA model, so that I can optimize our planning processes and maximize revenue. N/A				Conceptually sound	solution_oriented	Unambiguous	Conflict-free				
				logistics coordinator	As a logistics coordinator, I want precise sales forecasts, so that I can efficiently manage outgoing invoices and uninvoiced shipments to reduce costs. N/A				Conceptually sound	problem-oriented	Unambiguous	Conflict-free				
A35US3O1	A35	US3	O1_mini	data engineer	As a data engineer, I want to build a data mart on top of our data warehouse, so that we can seamlessly integrate daily loads of invoices and shipments data for accurate tracking. N/A	Interoperability	atomic	minimal	no_valid_rolesolution_oriented		Unambiguous	Conflict-free		estimatable	independent	
				analyst	As a business analyst, I want weekly aggregated sales data, so that I can identify trends and make informed decisions based on the most useful time intervals. N/A				Conceptually sound	problem-oriented	Unambiguous	Conflict-free				

A35US5O1	A35	US5	O1_mini	IT specialist	As a IT specialist, I want to ensure the data preparation process is robust, so that our sales predictions are based on high-quality and reliable data.	N/A	Reliability	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-free				estimatableindependent
A35US6O1	A35	US6	O1_mini	financial advisor	As a financial planner, I want to track each product's sales market, customer, quantity, and date, so that I can analyze performance and forecast future demand accurately.	N/A	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free			estimatableindependent
A35US7O1	A35	US7	O1_mini	manager	As a warehouse manager, I want sales predictions to align with logistics planning, so that we can optimize inventory levels and reduce storage costs.	N/A	N/A	atomic	minimal	no_feature						
A35US8O1	A35	US8	O1_mini	CEO	As a CEO of a wholesale company, I want a successful ongoing planning process based on reliable sales predictions, so that our organization can thrive in a competitive B2B environment.	N/A	Accuracy - Reliability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A35US9O1	A35	US9	O1_mini	customer	As a customer relationship manager, I want to use sales forecasts to anticipate customer needs, so that we can enhance customer satisfaction and loyalty.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free		estimatable	No
A35US10O1	A35	US10	O1_mini	manager	As an operations manager, I want detailed insights from the data mart on outgoing invoices and shipments, so that I can streamline our sales and logistics processes for better efficiency.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A36US1Ge	A36	US1	Gemini_1.5_flash	traffic engineer	As a traffic engineer, I want to use a wireless sensor network to monitor traffic patterns and classify moving vehicles in real-time, allowing me to optimize traffic flow and improve safety.	N/A	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free		estimatable	No
A36US2Ge	A36	US2	Gemini_1.5_flash	city planner	As a city planner, I want to use vehicle classification data from a sensor network to understand how different types of vehicles use the city's infrastructure, informing future planning decisions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A36US3Ge	A36	US3	Gemini_1.5_flash	officer	As a law enforcement officer, I want to use vehicle classification data to identify suspicious vehicles and track their movements, enhancing public safety and security.	Privacy - Justice/fairness - Non-maleficence	N/A	conjunctions	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free		No	No
A36US4Ge	A36	US4	Gemini_1.5_flash	researcher	As a transportation researcher, I want to analyze vehicle classification data from a sensor network to study the behavior of different vehicle types and develop new models for traffic management.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A36US5Ge	A36	US5	Gemini_1.5_flash	developer	As a developer of sensor network applications, I want to build a robust and efficient system for classifying moving vehicles in real-time, using the provided data set as a benchmark for performance.	N/A	Efficiency	conjunctions	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-free			estimatableindependent	

A36US6Ge	A36	US6	Gemini_1.5_flash	data scientist	As a data scientist, I want to explore the use of machine learning and signal processing techniques to extract meaningful features from sensor data and improve the accuracy of vehicle classification.	N/A	N/A	conjunctions	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A36US7Ge	A36	US7	Gemini_1.5_flash	network security specialist	As a network security specialist, I want to ensure the security and reliability of the wireless sensor network used for vehicle classification, protecting it from potential attacks and data breaches.	Non-maleficence	Security - (Security) Reliability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
A36US8Ge	A36	US8	Gemini_1.5_flash	citizen	As a citizen concerned about traffic congestion and emissions, I want to see technology used to improve traffic management and reduce the environmental impact of transportation.	N/A	N/A	atomic	minimal	no_feature						
A36US9Ge	A36	US9	Gemini_1.5_flash	advocate	As a privacy advocate, I want to ensure that the data collected by the sensor network for vehicle classification is used responsibly and does not violate individual privacy rights.	Privacy - Non-maleficence (Security) - Responsibility	Privacy	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	independent
A36US10Ge	A36	US10	Gemini_1.5_flash	global citizen	As a global citizen, I want to see smart cities adopt innovative technologies like wireless sensor networks to improve traffic flow, safety, and sustainability for all.	Non-maleficence (Safety) - Beneficence - Justice/fairness	N/A	atomic	minimal	no_feature						
A36US1LI	A36	US1	Llama 3.1 70b	researcher	As a researcher, I want to investigate the task of classifying the types of moving vehicles in a distributed, wireless sensor network, so that I can improve traffic monitoring and management.	N/A	N/A	atomic	minimal	no_feature						
A36US2LI	A36	US2	Llama 3.1 70b	developer	As a developer, I want to create a system that can classify the types of moving vehicles using data from a wireless sensor network, so that I can provide accurate and real-time information to traffic management authorities.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	No
A36US3LI	A36	US3	Llama 3.1 70b	data scientist	As a data scientist, I want to collect and preprocess a large dataset of raw time series data from a real-world experiment, so that I can extract valuable insights and features for vehicle classification.	N/A	N/A	conjunctions	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A36US4LI	A36	US4	Llama 3.1 70b	researcher	As a researcher, I want to develop a feature extraction and preprocessing pipeline that can transform raw time series data into spectral feature vectors, so that I can improve the accuracy of vehicle classification.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	independent
A36US5LI	A36	US5	Llama 3.1 70b	developer	As a developer, I want to use a maximum likelihood classifier to classify vehicles based on their spectral features, so that I can provide a baseline performance for comparison with other classification methods.	N/A	N/A	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free		estimatable	No

A36US6LI	A36	US6	Llama 3.1 70b	researcher	As a researcher, I want to investigate the performance of different classification algorithms on the compiled dataset, so that I can identify the most effective approach for vehicle classification.	N/A	Testability	atomic	minimal	no_valid_rolesolution_oriented	General	Conflict-free		estimatableNo	
					As a developer, I want to use the preprocessed dataset to train and test machine learning models for vehicle classification, so that I can develop a robust and accurate system.	N/A	Accuracy - Reliability - Testability	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	free		estimatableNo	
					As a traffic manager, I want to use a vehicle classification system to monitor and manage traffic flow, so that I can reduce congestion and improve traffic safety.	Non-maleficence(Safety) - Beneficence	N/A		atomic	minimal	Conceptually sound	problem-orientedGeneral	Conflict-free	No	No
A36US8LI	A36	US8	Llama 3.1 70b	manager	As a researcher, I want to explore the use of distributed, wireless sensor networks for real-time vehicle classification, so that I can enable more efficient and effective traffic management.	N/A									
A36US9LI	A36	US9	Llama 3.1 70b	researcher	As a developer, I want to create a system that can automatically classify vehicles in real-time using data from a wireless sensor network, so that I can provide timely and accurate information to traffic management authorities.	N/A	N/A	atomic	minimal	no_feature					
A36US10LI	A36	US10	Llama 3.1 70b	developer	As a transportation analyst, I want to classify moving vehicle types using wireless sensor networks, so that I can monitor and analyze traffic patterns effectively.	N/A	Performance - Accuracy	atomic	minimal	no_valid_rolesolution_oriented	General	Conflict-free		No	No
A36US1O1	A36	US1	O1_mini	analyst	As a data scientist, I want access to the extensive real-world dataset of raw time series and spectral feature vectors, so that I can develop and test advanced vehicle classification models.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Conflict-free		estimatable	No
A36US2O1	A36	US2	O1_mini	data scientist	As a network engineer, I want to implement a distributed wireless sensor network for vehicle classification, so that I can ensure scalable and reliable data collection across various locations.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	free		estimatable	independent
A36US3O1	A36	US3	O1_mini	Network engineer	As a machine learning researcher, I want to utilize the preprocessed spectral feature vectors, so that I can enhance the accuracy of vehicle type classification algorithms.	N/A	Scalability - Reliability	atomic	minimal	no_valid_rolesolution_oriented	General	Conflict-free		estimatable	independent
A36US4O1	A36	US4	O1_mini	researcher	As a system developer, I want to replicate the data collection and preprocessing procedures detailed in the study, so that I can build a similar vehicle classification system for my project.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	free		estimatable	No
A36US5O1	A36	US5	O1_mini	developer		N/A	N/A	atomic	minimal	no_feature					

A36US6O1	A36	US6	O1_mini	city planner	As an urban planner, I want to use classified vehicle data from wireless sensor networks, so that I can make informed decisions on infrastructure development and traffic management. As a quality assurance specialist, I want to evaluate the baseline classification results using the maximum likelihood classifier, so that I can benchmark the performance of new classification models.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	free		estimatable	No
				quality assurance specialist												
A36US7O1	A36	US7	O1_mini		As a security analyst, I want to classify types of moving vehicles in real-time, so that I can enhance surveillance and identify suspicious activities efficiently. N/A	N/A	Testability	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	free		estimatable	No
A36US8O1	A36	US8	O1_mini	analyst												
A36US9O1	A36	US9	O1_mini	researcher												
A36US10O1A36	A36	US10	O1_mini	software engineer	As a software engineer, I want to develop a user-friendly interface for visualizing classified vehicle types, so that stakeholders can easily interpret and utilize the traffic data for decision-making. As a casual sports fan, I want to participate in fantasy sports but feel overwhelmed by the amount of information and player choices. I want a platform that uses data and analytics to help me make informed decisions about which players to select for my team. A41US6Ge A41	US6	Gemini_1.5_flash	person with dietary restrictions	As a person with dietary restrictions, I want my food tracking app to accurately identify the ingredients in my meals to avoid allergens and adhere to my diet. Non-maleficence	Accuracy - Reliability - Safety	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free			No	No
A41US7Ge A41	US7	Gemini_1.5_flash	user	As a user, I want the food recognition system to be fast and efficient. N/A	Performance - Efficiency	conjunctions	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free			No	independent
A41US8Ge A41	US8	Gemini_1.5_flash	developer	As a developer, I want the model to be explainable so that I can understand its predictions and improve its accuracy. Transparency	Explainability - Interpretability - Maintainability	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free			estimatable	independent
A41US9Ge A41	US9	Gemini_1.5_flash	researcher	As a researcher, I want to understand how the model's attention mechanism works to gain insights into the visual features that are important for food recognition. N/A	N/A	atomic	minimal	no_feature							
A41US10GeA41	US10	Gemini_1.5_flash	user	As a user, I want the food recognition system to be reliable and accurate across a variety of different food types and images. Justice/fairness	Reliability - Accuracy	conjunctions	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free			No	No
A41US1LI A41	US1	Llama 3.1 70b	researcher	As a researcher in the field of multimedia, I want to access a large-scale ontology of food images to develop advanced food recognition algorithms, so that I can improve the accuracy of diet management and self-service restaurant applications. N/A	Completeness	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free			estimatable	independent
A41US2LI A41	US2	Llama 3.1 70b	developer	As a developer of food recognition systems, I need a comprehensive benchmark dataset to test and evaluate my algorithms, so that I can ensure the reliability and effectiveness of my system. Justice/fairness	Completeness - Testability - Reliability	atomic	minimal	no_valid_roles	resolution_oriented	Unambiguous	Conflict-free			estimatable	independent

A41US3LI	A41	US3	Llama 3.1 70b	user	As a user of a diet management application, I want the app to be able to accurately recognize and classify the food I eat, so that I can track my nutrition and make informed decisions about my diet.	N/A	Accuracy	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		No	No
A41US4LI	A41	US4	Llama 3.1 70b	restaurant owner	As a restaurant owner, I want to implement a self-service system that can automatically recognize and categorize food items, so that I can improve the efficiency and accuracy of my service.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A41US5LI	A41	US5	Llama 3.1 70b	researcher	As a researcher, I want to access a dataset with a large number of food categories and images, such as the ISIA Food-500 dataset, so that I can develop and test advanced food recognition algorithms.	N/A	N/A	atomic	not_minimal	no_valid_rolesolution_oriented	Unambiguous	free	Conflict-free		estimatable	independent
A41US6LI	A41	US6	Llama 3.1 70b	developer	As a developer of food recognition systems, I want to use a stacked global-local attention network to improve the accuracy of food recognition, so that I can provide more reliable results to my users.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	conflict	A41US9LI	estimatable	No	
A41US7LI	A41	US7	Llama 3.1 70b	user	As a user of a food recognition system, I want the system to be able to extract discriminative features from food images, such as texture and shape information, so that it can accurately classify the food.	N/A	Accuracy - Explainability	atomic	minimal	Conceptually sound	solution_oriented	Unambiguous	free		estimatable	No
A41US8LI	A41	US8	Llama 3.1 70b	researcher	As a researcher, I want to evaluate the effectiveness of different food recognition algorithms on a standard benchmark dataset, such as ISIA Food-500, so that I can compare and contrast the performance of different approaches.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	free	Conflict-free		estimatable	independent
A41US9LI	A41	US9	Llama 3.1 70b	developer	As a developer of food recognition systems, I want to use a cascaded spatial transformer to generate attentional regions from food images, so that I can improve the accuracy of food recognition and provide more detailed information about the food.	N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	source	A41US6LI	estimatable	No	
A41US10LI	A41	US10	Llama 3.1 70b	user	As a user of a food recognition system, I want the system to provide a comprehensive representation of the food, including both global and local features, so that I can make informed decisions about my diet and nutrition.	Justice/fairness	Completeness - Interpretability	atomic	not_minimal	Conceptually sound	solution_oriented	Unambiguous	free		estimatable	independent
A41US1O1	A41	US1	O1_mini	machine learning engineer	As a machine learning researcher, I want access to the ISIA Food-500 dataset with 500 categories and 399,726 images, so that I can develop and train advanced food recognition algorithms.	N/A	N/A	atomic	not_minimal	no_valid_rolesolution_oriented	Unambiguous	free	Conflict-free		estimatable	independent

A41US2O1	A41	US2	O1_mini	developer	As a diet management app developer, I want to integrate a comprehensive food recognition system, so that users can accurately track their food intake using images. As a self-service restaurant operator, I want to implement a robust food recognition system, so that customers can easily identify and select menu items through image-based interfaces. As a computer vision engineer, I want to utilize the stacked global-local attention network, so that I can enhance the accuracy and discriminative power of food image classifications. As a data scientist, I want to leverage hybrid spatial-channel attention mechanisms, so that I can extract more detailed and relevant features from food images for better recognition performance. As a benchmark dataset curator, I want to use the ISIA Food-500 dataset as a standard for evaluating food recognition models, so that I can ensure consistency and comparability across different research studies. As a multimedia application developer, I want to incorporate multi-scale regional features from attentional regions, so that my application can accurately recognize ingredients and detailed aspects of food items. As a academic instructor, I want to utilize the ISIA Food-500 dataset in my curriculum, so that students can work with a comprehensive and large-scale dataset for projects and assignments in food recognition. As a quality assurance specialist, I want to evaluate the effectiveness of the stacked global-local attention network on multiple benchmark datasets, so that I can validate its performance and reliability for deployment in real-world applications. As a technology innovator, I want to adopt the proposed food recognition method as a strong baseline, so that I can build upon it to create state-of-the-art solutions for various food-related multimedia applications. As a public health official in Virginia, I want to use a data-driven model to identify the best locations for mobile vaccination clinics, ensuring that under-vaccinated populations have convenient access to vaccines.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A41US3O1	A41	US3	O1_mini	restaurant operator		N/A	Usability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A41US4O1	A41	US4	O1_mini	machine learning engineer		N/A	Accuracy	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	conflict	A41US5O1	estimatable	No	
A41US5O1	A41	US5	O1_mini	data scientist		N/A	N/A	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	source	A41US4O1	estimatable	No	
A41US6O1	A41	US6	O1_mini	data engineer		N/A	N/A	atomic	minimal	no_feature						
A41US7O1	A41	US7	O1_mini	developer		N/A	Accuracy	atomic	minimal	no_valid_rolesolution_oriented	Vagueness	Conflict-free		No	No	
A41US8O1	A41	US8	O1_mini	instructor		N/A	N/A	atomic	minimal	no_feature						
A41US9O1	A41	US9	O1_mini	quality assurance specialist		N/A	N/A	atomic	minimal	no_feature						
A41US10O1A41	A41	US10	O1_mini	innovator		N/A	N/A	atomic	minimal	no_feature						
A42US1Ge	A42	US1	Gemini_1.5_flash	public health official		N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		estimatable	No

A42US2Ge	A42	US2	Gemini_1.5_flashcommunity leader	As a community leader in a rural area with low vaccination rates, I want to advocate for mobile vaccination clinics to be placed in areas where they are most likely to be used by residents.	N/A	N/A	atomic	minimal	no_feature							
A42US3Ge	A42	US3	Gemini_1.5_flashresearcher	As a researcher studying vaccine hesitancy, I want to use the model's ability to tailor recommendations for different demographic groups to understand the factors influencing vaccine uptake in specific communities.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No	
A42US4Ge	A42	US4	Gemini_1.5_flashpolicymaker	As a policymaker concerned with healthcare equity, I want to use the model to ensure that vaccine distribution strategies address the needs of underserved and marginalized communities.	N/A	Fairness	atomic	minimal	Conceptually sound	problem-oriented	Vagueness	Conflict-free		No	No	
A42US5Ge	A42	US5	Gemini_1.5_flashdata scientist	As a data scientist, I want to explore the use of real-time mobility data and other heterogeneous data sources to develop more sophisticated models for optimizing mobile vaccination site placement.	N/A	Performance	atomic	minimal	no_valid_rolesolution_oriented	Unambiguous	free	Conflict-free		estimatable	independent	
A42US6Ge	A42	US6	Gemini_1.5_flashpublic health official	As a public health communications specialist, I want to use the model's insights to develop targeted outreach campaigns that encourage vaccination among hesitant groups in specific locations.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No	
A42US7Ge	A42	US7	Gemini_1.5_flashtechnology developer	As a technology developer, I want to build a user-friendly platform that integrates the model's recommendations with other relevant information, such as vaccine availability and clinic hours, to improve accessibility and convenience for the public.	N/A	Usability - Interoperability - Accessibility conjunctions	minimal	minimal	no_valid_rolesolution_oriented	Unambiguous	free	Conflict-free		No	No	
A42US8Ge	A42	US8	Gemini_1.5_flashjournalist	As a journalist reporting on the pandemic, I want to use the model's findings to inform the public about the challenges and successes of vaccine distribution efforts in different regions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No	
A42US9Ge	A42	US9	Gemini_1.5_flashcitizen	As a citizen concerned about public health, I want to see data-driven approaches used to improve vaccine access and overcome vaccine hesitancy, ultimately contributing to a safer and healthier community.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No	
A42US10Ge	A42	US10	Gemini_1.5_flashglobal citizen	As a global citizen, I want to see this model adapted and implemented in other regions facing similar challenges with vaccine distribution, promoting equitable access to vaccines and mitigating the impact of the pandemic worldwide.	Justice/fairness - Beneficence	N/A	atomic	minimal	no_feature							

A42US1LI	A42	US1	Llama 3.1 70b	researcher	As a public health official, I want to visualize the vaccination rates across different demographic groups in Virginia so that I can identify areas with low vaccination rates.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A42US2LI	A42	US2	Llama 3.1 70b	developer	As a data analyst, I need to integrate fine-grained mobility data with US Census and vaccination uptake data to inform mobile vaccination site placement recommendations.	N/A	Interoperability	atomic	minimal	Conceptually sound	solution_oriented	Unambiguous	Conflict-free		estimatable	No
A42US3LI	A42	US3	Llama 3.1 70b	data scientist	As a health department staff member, I want to receive real-time recommendations for mobile vaccination site placement in Virginia that target under-vaccinated populations.	N/A	Performance	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No
A42US4LI	A42	US4	Llama 3.1 70b	researcher	As a policy maker, I want to see the impact of different vaccination strategies on various demographic groups so that I can make informed decisions.	N/A	Interpretability	atomic	minimal	Conceptually sound	problem-oriented	General	Conflict-free		No	No
A42US5LI	A42	US5	Llama 3.1 70b	developer	As a public health official, I want to be able to filter mobile vaccination site placement recommendations by specific demographic groups (e.g. age, race, ethnicity) so that I can tailor my outreach efforts.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A42US6LI	A42	US6	Llama 3.1 70b	user	As a researcher, I need to analyze the effectiveness of different mobile vaccination site placement strategies in reaching hesitant groups and increasing vaccine uptake.	N/A	N/A	atomic	minimal	no_feature						
A42US7LI	A42	US7	Llama 3.1 70b	researcher	As a health department staff member, I want to view the locations of previously deployed vaccine sites and their corresponding success rates so that I can inform future placement decisions.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A42US8LI	A42	US8	Llama 3.1 70b	developer	As a public health official, I want to receive alerts when new data becomes available that may impact mobile vaccination site placement recommendations.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A42US9LI	A42	US9	Llama 3.1 70b	data scientist	As a data analyst, I need to be able to adjust the model's parameters to account for evolving mobility patterns and changing vaccination rates.	N/A	Adaptability	atomic	minimal	no_valid_roles	resolution_oriented	General	Conflict-free		No	No
A42US10LI	A42	US10	Llama 3.1 70b	researcher	As a policy maker, I want to see a comparison of the number of vaccine doses administered at sites placed using our model versus those placed without our recommendations so that I can evaluate the model's effectiveness.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	independent
A42US10I	A42	US1	O1_mini	public health official	As a Virginia public health official, I want a data-driven model that recommends optimal locations for mobile vaccination sites, so that I can effectively target and increase vaccination rates in under-vaccinated populations.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguous	Conflict-free		estimatable	No

A42US2O1	A42	US2	O1_mini	data scientist	As a data scientist, I want to integrate fine-grained mobility data with US Census and vaccination uptake data, so that I can accurately identify locations frequented by unvaccinated individuals for vaccine site placement.	N/A	Accuracy - Interpretability	atomic	minimal	no_valid_rolesolution_oriented	Unambiguousfree	Conflict-free	estimatable	No	
A42US3O1	A42	US3	O1_mini	polycymaker	As a policy maker, I want to deploy mobile vaccination sites based on real-time model recommendations, so that I can address healthcare disparities and reduce the spread of COVID-19 variants in vulnerable communities.	N/A	Performance	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free	estimatable	No
A42US4O1	A42	US4	O1_mini	community leader	As a community leader in a rural area, I want accessible mobile vaccination sites near our community, so that more residents can get vaccinated without traveling long distances.	N/A	N/A	atomic	minimal	no_feature					
A42US5O1	A42	US5	O1_mini	vaccination site coordinator	As a mobile vaccination site coordinator, I want to know which locations maximize vaccine uptake among hesitant demographic groups, so that I can allocate resources where they are most needed and effective.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free	estimatable	No
A42US6O1	A42	US6	O1_mini	healthcare provider	As a healthcare provider, I want data-driven placement of vaccination sites, so that I can see higher vaccination rates in targeted areas and better protect my patients from COVID-19.	N/A	N/A	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free	estimatable	No
A42US7O1	A42	US7	O1_mini	city planner	As an urban planner, I want to use the model's recommendations for mobile vaccination sites, so that I can incorporate public health strategies into city planning and infrastructure development.	N/A	Interoperability	atomic	minimal	Conceptually sound	problem-oriented	Unambiguousfree	Conflict-free	estimatable	No
A42US8O1	A42	US8	O1_mini	researcher	As a demographic researcher, I want to analyze the impact of customized vaccination site placement across different demographic groups, so that I can study and understand the effectiveness of tailored public health interventions.	N/A	N/A	atomic	minimal	no_feature					
A42US9O1	A42	US9	O1_mini	citizen	As a member of the general public in an under-vaccinated area, I want convenient access to mobile vaccination sites recommended by data models, so that I can easily get vaccinated and protect my community from COVID-19.	N/A	N/A	atomic	minimal	no_feature					
A42US10O1A42	A42	US10	O1_mini	developer	As a developer of public health technologies, I want to build real-time, mobility-aware models for vaccine site placement, so that public health officials can utilize advanced tools to combat pandemics more effectively.	N/A	Performance	atomic	minimal	no_valid_rolesolution_oriented	General	Conflict-free	No	No
